INFOBOX
The following section shows the progression of the external EHC. Note that it does not involve questions that are directly represented by variables. Rather, d-variables (input variables) are preloaded for each individual question. From the responses to the questions, EHC variables (output variables) are made and shown in the EHC output section.
First-time respondents (d0=2) are asked in the EHC about a specific time period. This time period is called „EHC time period“ and spans the period between January of the field period of the previous wave and the date of the current interview.
In the partnership and children modules, the number of persons is shortened to X.

Routing of partnership modules

Whether questions regarding partnership are posed depends on the current status of the respondent. There is a module for singles, one with questions regarding the current partnership, one about meeting a new partner, and one about separation from the ex-partner. Routing of children modules

INFOBOX
Definition of auxiliary variables that capture children's age groups:

Many questions within the children module are posed only if children of a particular age group are present. In order to increase the clarity of the filters, auxiliary variables corresponding to these age groups are defined in the following table.

Key:
1. Age groups are not disjointed.
2. Field start year = Year in which field work of current wave was started. The field phase of this wave extends from the fall/winter of the field start year through the winter/spring of the following field start year.

Group Label	Formal notation	Verbal definition	Formal definition
Children newly born after the previous wave	ag1kx=1	Child x was born after the previous wave (child who was indicated in the EHC of this wave but not in the previous wave, who is still living, and who was born no more than 1 year before the field start year (2 years for respondents who skipped a wave)), or first-time respondent's child	(d(28+x)≠1,2,-1 & ehc7kxg=1,2,-1 & ehc11kx=0) & ((d0=1 & oij-ehc8kxy<=1) | (d0=0 & oji-ehc8kxy<=2))
Infants	ag2kx=1	Child x was born in the field start year or the year thereafter (and is still living)	ehc11kx=0 & oji-ehc8kxy=0,-1
Toddlers	ag3kx=1	Child x was born one or two years before the field start year (and is still living)	ehc11kx=0 & oji-ehc8kxy=1,2
Pre-school children	ag4kx=1	Child x was born three to five years before the field start year (and is still living)	ehc11kx=0 & oji-ehc8kxy=3,4,5
Children aged 6-7	ag5kx=1	Child x was born six to seven years before the field start year (and is still living)	ehc11kx=0 & oij-ehc8kxy=6,7
Children under 16	ag6kx=1	Child x was born fewer than 16 years before the field start year (and is still living)	ehc11kx=0 &oji-ehc8kxy<16
Children under 18 (minors)	ag7kx=1	Child x was born fewer than 18 years before the field start year (and is still living)	ehc11kx=0 & oji-ehc8kxy<18
Children under 21	ag8kx=1	Child x was born fewer than 21 years before the field start year (and is still living)	ehc11kx=0 &oji-ehc8kxy<21

Definition of CAPI children

INFOBOX

If no children were eligible to be CAPI children in the previous wave because there were no children between the ages of 8 and 15 in the household, but now there is such an eligible child, the youngest of these shall be interviewed as a CAPI child. If there were children in the previous wave who were eligible for the CAPI survey, the attempt shall be made again to interview them. Additionally, children who are younger than the first (and thus oldest) child previously selected for the CAPI survey and who are now 8 years or older shall be interviewed.
In detail, the selection of the CAPI children is defined as follows:

Child x (with the child number x=1,...,15) of the respondent is selected as CAPI child if one of the following conditions is met:

- if in the previous waves no child of the respondent had been selected as CAPI child and
  - Child x is the youngest child living in the respondent's household who was born 8-15 years before the first year of field work. If this condition applies to more than one child (same year of birth), the child is selected from the group of all eligible children who was first mentioned by the respondent.
- if in the previous waves a child of the respondent had already been selected as a CAPI child and
  - Child x was a CAPI child in the previous wave, currently lives in the respondent's household and was born 8-15 years before the first year of field work, or
  - Child x was not a CAPI child in the previous wave, currently lives in the respondent's household, is younger than the first CAPI child and was born at least 8 years before the first year of field work.

Formal condition:

((d420≠0 & d(421+x)=1 & ehc11kx≠1 & ehc10kx=1,...,8 & 8≤oij-ehc8kxy≤15) |
(d420≠0 & d(421+x)≠1 & ehc11kx≠1 & ehc10kx=1,...,8 & (oij-d420)≥oij-ehc8kxy≥8) |
(d420=0 & ehc11kx≠1 & ehc10kx=1,...,8 & 8≤oij-ehc8kxy≤15 (the youngest child, if more than one child fulfills this criteria (same year of birth), the first mentioned: x<y for all x=1,...,14 and y=2,...,15) for x=0,...,14))

If child x (with the child identification number x=1,...,15) is selected as CAPI child, the variable capikidkx is set to 1.
The identification number cidx=id+200+x for capikidkx=1 allows for an explicit assignment of the data from the children's survey.

Respondents currently receiving vocational training (ehc19i3=1)

INFOBOX

In question 35 (sd34i_) and question 36 (sd35i_) the x refers to the type of employment. This x corresponds to the last digit of the following EHC-variables: ehc19i12, ehc19i13, ehc19i14, ehc19i15, ehc19i16. Accordingly, x has five possible values (x=1,...,5), such that

1 = employed part time
2 = internship, trainee, etc.
3 = marginal part-time employment, mini-job, "Ein-Euro-Job"
4 = occasionally or irregularly employed
5 = other type of job.

Questions 35 (sd34i_) and 36 (sd35i_) are asked together for each type of activity indicated by the respondent, starting with the first mentioned activity and then for each additional type of activity mentioned. If a type of activity was not mentioned by the respondent in the EHC, the corresponding variables take on the value of -3 "not applicable".

Question 35 Variable sd34i_ for x=1,...,5	**You indicated that you are currently** [Respondents who are employed part time (ehc19i12=1)]: **employed part-time.** [Respondents who are in an internship, working as a trainee, etc. (ehc19i13=1)]: **in an internship, working as a trainee, etc.** [Respondents, who are in marginal part-time employment (ehc19i14=1)]: **in marginal part-time employment or have a mini-job or an „Ein-Euro-Job“.** [Respondents, who are occasionally or irregularly employed (ehc19i15=1)]: **occasionally or irregularly employed.** [Respondents, who have another type of job (ehc19i16=1)]: **employed at another type of job. INFOBOX

For the routing of the following questions, occupation at the time of the previous interview and current occupation were used as filter variables. In order to make routing instructions easier to read, the auxiliary variables erw0, erw1, and erw2 have been generated, and are defined as follows:

1. Respondent was employed at the time of the previous wave:
erw0=1 if
ehc19i3mx(x=date of interview previous wave)=1 | ehc19i10mx(x=date of interview previous wave)=1 | ehc19i11mx(x=date of interview previous wave)=1 | ehc19i12mx(x=date of interview previous wave)=1 | ehc19i13mx(x=date of interview previous wave)=1 | ehc19i14mx(x=date of interview previous wave)=1 | ehc19i15mx(x=date of interview previous wave)=1 | ehc19i16mx(x=date of interview previous wave)=1
else erw0=0

2. Respondent is employed at the time of the current wave:
erw1=1 if
ehc19i10=1 | ehc19i11=1 | ehc19i12=1 | ehc19i13=1 | ehc19i14=1 | ehc19i15=1 | ehc19i16=1 | job22=2
else erw1=0

3. Respondent is employed at several parallel jobs at the time of the current interview:
erw2=1 if
(ehc19i10+ehc19i11+ehc19i12+ehc19i13+ehc19i14+ehc19i15+ehc19i16+(job22=2)>1) |
sd34i1=1 | sd34i2=1 | sd34i3=1 | sd34i4=1 | sd34i5=1
else erw2=0

Note: erw2 is defined differently in the CAPI programming, but the result is identical: (ehc19i10+ehc19i11+ehc19i12+ehc19i3+ehc19i14+ehc19i15+ehc19i16 >1) or
(ehc19i10+ehc19i11+ehc19i12+ehc19i13+ehc19i14+ehc19i15+ehc19i16 = 1) and job22=2 or
sd34i1=1|sd34i2=1|sd34i3=1|sd34i4=1|sd34i5=1)

Newborn module

INFOBOX
The questions 205 (crn1kx) to 210 (crn6kx) are posed in their entirety first for the first child born since the previous interview, and then for each additional newborn.
The x in these variables corresponds to the child identification number. If the respondent, for example, already had two older children, and a new child has arrived since the previous wave, the questions are not posed for the first two children with the child identification number one (x=1) and two (x=2); these variables are articulated as -3 "does not apply". The following questions are posed only for the newborn child (x=3) and the variables have valid values only for this case.

INFOBOX
The questions 250 (crn31kx) to 254 (crn95kx_) are posed for each (relevant) child in blocks, i.e. all questions are posed first for the first child and then, in subsequent iterations, for each additional child.
The x in these variables refers to the child number. An example for illustration: The respondent has for example no contact to the child with the child number 1 and all filter conditions apply to the second child, the questions are not posed for child number 1 (x=1) such that the variables take on the value -3 "Does not apply". The questions are posed to the child with the child number 2 (x=2) and the variables have valid values.

Parental benefits

INFOBOX
The questions 241 (crn53kxi1) to 259 (crn62kx) are posed for each (relevant) child in blocks, i.e. all questions are posed first for the first child and then, in subsequent iterations, for each additional child.

Question 266

Variable crn53kxi1

for x=1,...,15

[First iteration]: **The next questions cover the topic of parental benefits (Erziehungsurlaub and Erziehungsgeld). We would like to know how it was for you. How was it with your child** [name child x (ehc7kxn)]**? Did you receive parental benefits during the first 14 months of** [name child x (ehc7kxn)]**'s life?**

Int.: In case of questions: Payment of parental benefits (Erziehungsgeld) is limited, in principle, to 12 months after the child's birth if only one parent applies for it. If both parents share parental leave (Erziehungsurlaub), the benefits can be extended to a total of 14 months. The parental benefit subsidy is conceptualized as replacement for lost income; however, unemployed parents may also receive it.

Definition of target children for the parenting survey

INFOBOX
The selection of the children relevant for the parenting survey is defined as follows:

Child x is selected as a parenting survey child if one of the following conditions is met:

- Child x is a CAPI child
- Child x is a biological or adopted child, was born between 8 and 15 years before the start of fieldwork (and alive), lives exclusively outside the household, and is in contact with respondent
- Child x is 6/7 years old and lives with respondent in the same household

Formal condition: capikidkx=1 |(ehc9kx=1,2 & ehc11kx=0 & oij-ehc8kxy≥8 & oij-ehc8kxy≤15 & ehc10kx>8 & crn16kx=1,...,6) | (ag5kx=1 & ehc11kx=0 & ehc10kx=1,...,8).
If child x (with child identification number x=1,...,15) is selected as a parenting survey child, the variable pqkx is set to 1.
The assignment of a parenting survey instrument to the respective children is clearly indicated by the identification number cidx=id+200+x.

- Respondent and partner live in the same HH.

Formal condition: hpc=1 & (capikidkx=1 | (ag5kx=1 & ehc11kx=0 & ehc10kx=1,...,8)).

INFOBOX
The selection of the children relevant for the PAYA survey is defined as follows:
Child x is selected as a target child for the PAYA survey if one of the following conditions is met:

If child x (with child identification number x=1,...,15) is selected for the PAYA survey, the variable youkx is set to 1.
The assignment of a PAYA survey instrument to the respective children is clearly indicated by the identification number cidx=id+200+x.
