# Generated Variables

The following table shows a list of all variables, which were generated during the data editing process and which are part of the delivered anchor data. In order to facilitate data analysis and to enhance comparability of results, the pairfam staff produced a number of variables that are of interest to many research projects. Section „Generated variables and scales"' of the Data Manual contains a detailed descrition about the generating procedures.

Thank you very much for participating in our study!
First, I will briefly explain how the interview will be conducted. I will read questions to you referring to the topics of family, relationships, children, work, and daily life.
Some questions are about your personal opinion on a certain topic. There are no right or wrong answers to these questions - only your personal assessment is of importance to us.
Your participation is voluntary but nevertheless very important. All information you are providing will be treated as strictly confidential and in full compliance with all privacy policies.
Do you have any questions? If not, let us begin the interview.

Respondents with a partner (sd3=1)

## Relationship episodes

**INFOBOX**
Questions 9 to 13 are about relationship episodes with the current partner. Z stands for the z-th episode of the relationship. Information is gathered for each episode on how the relationship began (sd5ezb), whether it ended in separation (sd6ez), and if it did, when the separation took place (sd5eze). The wording of the question regarding the first episode is different in some aspects from that of the questions regarding subsequent episodes (see questions 9 and 12 and as well questions 10 and 13).

# Cohabitation episodes

---

**INFOBOX**

Questions 14 to 19 are about cohabitation episodes of the respondent with their current partner. Z stands for the z-th cohabitation episode, sd7ez indicates whether the respondent lives together with their current partner. In sd8ezb and sd9eze, the beginning and the end of this cohabitation episode are recorded. The wording for the first episode is different from that for subsequent episodes (see questions 14, 16 and 19 as well as questions 15 and 17).

The current cohabitation episode is documented first. If the respondent mentions currently living together with the partner, the starting point but not the ending point of this cohabitation episode is asked for, since it is still ongoing. Consequently, the variables sd8e1e_ do not exist. If the respondent lived together with their partner in the past but not at present, no first cohabitation period (z=1) exists. Past cohabitation periods are recorded in higher-level cohabitation episodes (z>1).

# Past Partnerships

Now I would like to ask you about your partnerships, beginning with the age of 14 [respondents with a partner (sd3=1): with the exception of your current relationship].
With whom did you have a relationship? We are interested in all relationships that were important to you. This means relationships that lasted longer than 6 months, or those in which you lived with your partner, or those that led to the birth of a child, or those that were important to you for other reasons.

| Question 24<br><br>Variable rtr1px_<br><br>für x=1/X | **Please tell me the name of the [x-th] partner.**<br><br>*Int.: If the same name is mentioned more than once, ask whether it is indeed the same person, or whether it is a different person who happens to have the same name. If it is a different person, indicate it in such a way that all persons can be clearly distinguished from each other and are identifiable. If it is the same person, enter the information only once. Ask and guarantee anonymity!*<br><br>Comment: Names of partners that have already been mentioned are displayed here.<br>"don't know" and "no response" can only be entered for name and sex at the same time. This means if you entered "no response" for the name, this also automatically refers to sex. |

## Relationship history

**INFOBOX**
X stands for the x-th partner, z for the z-th relationship episode. The following questions 25 to 29 are asked for each partner mentioned by the respondent. The set of questions is asked separately for each partner. When questions are completed for one partner, the same questions will be asked for the next partner. For all relationship episodes with a partner, the beginning (rtr2pxezb_) and end (rtr2pxeze_) are recorded. Information on possible additional episodes with the same partner is stored in rtr3pxez. To some extent, the same information is requested in different questions; see questions 25 and 28.

**INFOBOX**
X stands for the x-th ex-partner, z stands for the z-th cohabitation period. The set of cohabitation history questions is asked separately for all partners with whom the respondent lived together (for each rtr1px=1, see question 31). For all cohabitation episodes with a partner, the beginning (rtr7pxezb_) and end (rtr7pxeze_) are recorded. Information on a possible additional episode is stored in rtr8pxez.

# Children

Now I would like to know if you have or had children.
By that I mean all biological children, whether they live with you or not.
Also adopted children, children of a partner, or foster children are recorded here, if they currently live with you or have ever lived with you.
In case of foster children: only foster children in full-time care

INFOBOX
Questions 51 to 54 are about episodes of living in the same household with a child who currently does not live together with the respondent. Z stands for the z-th period of living together with child x. For each child it is recorded whether there was a z-th episode of living together (rtr16kxez), and for each episode it is recorded when it started (rtr17kxezb_ ) and ended (rtr17kxeze_ ). The wording for the first episode is to some extent different from that for subsequent episodes (see questions 51 and 54).
