INFOBOX

The following section shows the progression of the external EHC. Note that it does not involve questions that are directly represented by variables. Rather, d-variables (input variables) are preloaded for each individual question. From the responses to the questions, ehc-variables (output variables) are made and shown in the EHC-output section.

First-time respondents (d0=2) are asked in the EHC about a specific time period. This time period is called "EHC time period" and spans the time period between January, 2010 and the date of the interview.

In the partnership and children modules, the number of persons is shortened as X.

[First-time respondents(d0=2): We would like to know how your life has progressed since [EHC time period] in the areas of partnership, children, residence, work, and career. This first section is about intimate relationships.]

You may remember that in [date of interview previous wave (d5, d6)] we talked about events in your life after the first interview in the domains of partnership, children, dwelling, job, and career. This time, too, we would like to know what has happened in your life since the last interview.

This first section is about intimate relationships.

In the last interview it was recorded that you had a partner at the time of that interview. He [partner from previous wave female (d9=2): She] is listed here already. First, I would like to ask if you also had other relationships after [date of interview previous wave (d5,d6)].

Int.: Date of birth can be changed only for partners from the previous wave. For new partners, no date of birth can be entered.

If respondent does not indicate month and year: "Please try to indicate the date as precisely as possible. If you don't remember exactly, please try to tell me at least the season and year, or only the year."

We would now like to know in which months you and your partner were having a relationship, if and when you were living together or were married. You see here a calendar with one column for every month between the last interview [Firt-time respondents (d0=2): EHC time period] and today. Also, your current partnership status is entered in the column labelled “now”.

For each partner there are three lines, one for having a relationship, one for living together, and one for marriage or civil union.

We will proceed like this: You look at the screen and tell me what happened since the last interview [first-time respondents (d0=2): EHC time period], and I will enter the data. After we are finished, you can check that the information is correct.

Routing partnership modules

Whether questions regarding partnership are posed depends on the current status of the respondent. There is a module for singles, one with questions regarding the current partnership, one about meeting a new partner, and one about separation from the ex-partner. Routing Children Modules

INFOBOX

If no children were eligible to be a CAPI-child in the previous wave because there were no children between the ages of 8 and 15 in the household but now there is such an eligible child, the youngest of these shall be interviewed as a CAPI-child. If there were children in the previous wave who were eligible for the CAPI survey, the attempt shall be made again to interview them. Additionally, children who are younger than the first (and thus oldest) child previously selected for the CAPI survey and who are now 8 years or older shall be interviewed.

In detail, the selection of the CAPI children is defined as follows:

Child x (with the child number $x=1,\dots,10$) of the respondent is selected as CAPI child if one of the following conditions is met:

- if in the previous waves no child of the respondent had been selected as CAPI child and
 - Child x is the youngest child living in the respondent's household who was born 8-15 years before the first year of field work. If this condition applies to more than one child (same year of birth), the child is selected from the group of all eligible children who was first mentioned by the respondent.
- if in the previous waves a child of the respondent had already been selected as a CAPI child and
 - Child x was a CAPI child in the previous wave, currently lives in the respondent's household and was born 8-15 years before the first year of field work, or
 - Child x was not a CAPI child in the previous wave, currently lives in the respondent's household, is younger than the first CAPI child and was born at least 8 years before the first year of field work.

Formal condition:

$((d420 \neq 0 \ \& \ d(421+x)=1 \ \& \ ehc11kx \neq 1 \ \& \ ehc10kx=1,\dots,8 \ \& \ 8 \leq oij-ehc8kxy \leq 15) \mid$

If child x (with the child identification number $x=1,\dots,10$) is selected as CAPI-child, the variable $capikidx$ is set to 1.

INFOBOX

All children reported in the EHC are assigned a fixed person number: $cidx=id+200+x$.

INFOBOX

Definition of auxiliary variables that capture children's age groups:

Many questions within the children module are posed only if children of a particular age group are present. In order to increase the clarity of the filters, auxiliary variables corresponding to these age groups are defined in the following table.

Key:

1. Age groups are not disjointed.
2. Field start year = Year in which field work of current wave was started. The field phase of this wave extends from the fall/winter of the field start year through the winter/spring of the following field start year.

Group Label	Formal notation	Verbal definition	Formal definition
Children newly born after the previous wave	ag1kx=1	Child x was born after the previous wave (child who was indicated in the EHC of this wave but not in the previous wave, who is still living, and who was born no more than 1 year before the field start year (2 years for respondents who skipped a wave))	$(d(28+x) \neq 1,2,-1 \quad \& \quad ehc7kxg=1,2,-1 \quad \& \quad ehc11kx=0) \quad \& \quad ((d0=1 \quad \& \quad 2011-ehc8kxy \leq 1) \mid (d0=0 \quad \& \quad 2011-ehc8kxy \leq 2))$
Infants	ag2kx=1	Child x was born in the field start year or the year thereafter (and is still living)	$ehc11kx=0 \quad \& \quad 2011-ehc8kxy=0,-1$
Toddlers	ag3kx=1	Child x was born one or two years before the field start year (and is still living)	$ehc11kx=0 \quad \& \quad 2011-ehc8kxy=1,2$
Children under 16	ag4kx=1	Child x was born fewer than 16 years before the field start year (and is still living)	$ehc11kx=0 \quad \& \quad 2011-ehc8kxy < 16$
Children under 21	ag5kx=1	Child x was born fewer than 21 years before the field start year (and is still living)	$ehc11kx=0 \quad \& \quad 2011-ehc8kxy < 21$

INFOBOX

In question 24 (sd34i_) and question 25 (sd35i_) the x refers to the type of employment. This x corresponds to the last digit of the following EHC-variables: ehc19i12, ehc19i13, ehc19i14, ehc19i15, ehc19i16. Accordingly, x has five possible values (x=1,...,5), such that

1 = employed part time

2 = internship, trainee, etc.

3 = marginal part-time employment, mini-job, one-euro job when receiving unemployment benefits

4 = occasionally or irregularly employed

5 = other type of job.

The question 35 (sd34i_) and 36 (sd35i_) are asked together for each type of activity indicated by the respondent, starting with the first mentioned activity and then for each additional type of activity mentioned. If a type of activity was not mentioned by the respondent in the EHC, the corresponding variables take on the value of -3 "not applicable".

For the routing of the following questions, occupation at the time of the previous interview and current occupation were used as filter variables. In order to make routing instructions easier to read, the auxiliary variables *erw0*, *erw1*, and *erw2* were generated, defined as follows:

1. Respondent had an occupation at the time of the previous wave:

erw0=1 if

ehc19i3mx(*x*=month of interview previous wave)=1 | *ehc19i10mx*(*x*=month of interview previous wave)=1 |
ehc19i11mx(*x*=month of interview previous wave)=1 | *ehc19i12mx*(*x*=month of interview previous wave)=1 |

ehc19i15mx(*x*=month of interview previous wave)=1 | *ehc19i16mx*(*x*=month of interview previous wave)=1
else *erw0*=0

2. Respondent has an occupation at the time of the current wave:

erw1=1 if

ehc19i10=1 | *ehc19i11*=1 | *ehc19i12*=1 | *ehc19i13*=1 | *ehc19i14*=1 | *ehc19i15*=1 | *ehc19i16*=1 | *job22*=2

else *erw1*=0

3. Respondent has several parallel occupations at the time of the current interview:

erw2=1 if

(*ehc19i10*+*ehc19i11*+*ehc19i12*+*ehc19i13*+*ehc19i14*+*ehc19i15*+*ehc19i16*+(*job22*=2)>1) | *sd34i1*=1 |
sd34i2=1 | *sd34i3*=1 | *sd34i4*=1 | *sd34i5*=1

Contact of biological children to respondent, to ex-partner, and to partner outside of household

INFOBOX

Question 145 (crn16kx) and question 146 (crn17kx) are asked together initially for the first relevant child and then for each additional relevant child.

The x in these variables refers to the child number. An example for illustration: The respondent has two children, of whom the child with the child number 1 does not fulfill the filtering conditions, but the second child does. The two questions are not posed in this case to the child with the child number 1 (x=1) such that the variables take on the value -3 "Does not apply". The questions are posed only to the child with the child number 2 (x=2) and the variables have valid values.

INFOBOX

INFOBOX

The questions 148 (crn1kx) to 153 (crn6kx) are posed in their entirety first for the first newborn and then for each additional newborn.
The x in these variables corresponds to the child identification number. If the respondent, for example, already had two older children, and a new child has arrived since the previous wave, the questions are not posed for the first two children with the child identification number one (x=1) and two (x=2); these variables are articulated as -3 "does not apply". INFOBOX

The questions 154 (crn7kx) to 162 (crn10kxi_) are posed for each (relevant) child in blocks, i.e. all questions are posed first for the first child and then, in subsequent iterations, for each additional child.

The "x" in the variables refers to the child identification number. If the respondent has, for example, an older child and a child born in 2010, the questions are not posed for the older child with the child identification number of 1 (x=1) and each of the variables are coded with the value of -3 "does not apply". The questions are posed for the younger child and the variables are coded with valid values.

Question 176 (crn11_) is posed at the end and is posed only this one time.

Beginning with net7px, 8 persons of the maximum 30 named who are not the partner, a child, or parent of the respondent are chosen randomly (if more than 8 eligible persons are named).
