Demography - Event History Calendar (EHC)

INFOBOX

The following section shows the progression of the external EHC. Note that it does not involve questions that are directly represented by variables. Rather, d-variables (input variables) are preloaded for each individual question. From the responses to the questions, EHC variables (output variables) are made and shown in the EHC output section.

First-time respondents (d0=2) are asked in the EHC about a specific time period. This time period is called „EHC time period“ and spans the period between January of the field period of the previous wave and the date of the current interview.

In the partnership and children modules, the number of persons is shortened to X.

Partnership module: X=1,...,5

Children module: X=1,...,15

[First-time respondents (d0=2): We would like to know how your life has progressed since [EHC time period] in the areas of partnership, children, residence, work, and career. This first section is about intimate relationships.]

You may remember that in [date of interview previous wave (d5, d6)] we talked about events in your life after the first interview in the domains of partnership, children, residence, job, and career. Again, we would like to know what has happened in your life since the last interview.

This first section is about intimate relationships.

[Not first-time respondents (d0≠2) and without partner in the previous wave (d7=2 & d507≠1): Please tell me with whom you have been together since the last interview.]

In the last interview it was recorded that you had a partner [respondents who were married but separated from this partner in the previous wave (d507=1): [respondents with a partner and married but separated from this partner in the previous wave (d7=1 & d507=1): and] were married] at the time of that interview. **He** [partner from previous wave female (d9=2): She][married but separated: This] **is listed here already. If respondent does not indicate month and year: "Please try to indicate the date as precisely as possible. If you don't remember exactly, please try to tell me at least the season and year, or only the year."

Respondents who had a partner in the previous wave or in the time between the previous and current waves or who were married in the previous wave (d7=1 | P2="Yes" | d507=1)

Note: At this question a table with several rows appears in which up to five partners (name and sex of partner) the respondent was/is with between the previous and current waves can be entered. If a partner had been named in the previous wave, this person's name (d8), sex (d9), and date of birth (d397, d398, d317) are shown in the first row. If the sex is not indicated (d9≠1,2), no sex will be shown. If no date of birth was indicated (d397, d398, d317=0), "0" is shown.

Pop-Up 1: Respondents who indicated an invalid date of birth in P3 for the partner from the previous wave: "Please enter a valid value for the day [if month invalid: 'month'; if year invalid: 'year'] of birth." (OK)

Pop-Up 2: Respondents who changed name, sex, or date of birth of a partner from the previous wave in P3: "You made changes in the data on your partner from the last survey. Is this really the partner from the last survey?" (Yes/No) -> "Yes" + "Continue": proceed with P3 and changes will be saved; "No" + "Continue": proceed with P3, no changes

Pop-Up 3: Respondents who failed to enter a name for a partner in P3: "Please enter a name for partner [partner number]." (OK)

Pop-Up 4: Respondents who failed to enter a sex for a partner in P3: "Please enter the sex of [name of current partner]."(OK)

EHC 4

P4

We would now like to know in which months you and your partner were having a relationship, if and when you were living together, or were married. You can see here a calendar with one column for each month between the last interview [First-time respondents (d0=2): EHC time period] and today. Also, your current partnership status is entered in the column labelled "now".

For each partner there are three lines, one for having a relationship, one for living together, and one for marriage or civil union.

We will proceed as follows: You will look at the screen and tell me what has happened since the last interview [first-time respondents (d0=2): EHC time period], and I will enter the data. After we are finished, you can check if the information I have entered is correct.

Navigation: "Go back": proceed with P3; "Continue": proceed with P5

Respondents who had a partner in the previous wave or in the time between the previous and current wave, or who were married in the previous wave (d7=1 | P2="Yes" | d507=1)

Note: The screen P4 (pd3) is shown only once during the EHC procedure. It is not possible to return to this screen a second time.

EHC 5

P5

In which months were you together with [name of partner X (from P3)]?

In which months did you and [name of partner X] live together?

In which months were you and [name of partner X] married [same-sex partner (from P3): in a civil union]?

The main table has columns for months (Jan, Feb, März, April, Mai, Juni, Juli, Aug, Sep, Okt, Jetzt) and a 'Fertig' checkbox for each row. The rows are organized by partner: Marion (Weiblich), Stefanie (Weiblich), and Lisa (Weiblich). Each partner has three rows: Beziehung, Wohnen, and Ehe. Marion's 'Beziehung' row has a green box with '01.2011'. Marion's 'Wohnen' row has a blue box with '01.2011'. Marion's 'Ehe' row has a yellow box with '01.2011'. Routing of partnership modules

Whether questions regarding partnership are posed depends on the current status of the respondent. There is a module for singles, one with questions regarding the current partnership, one about meeting a new partner, and one about separation from the ex-partner. The following overview shows which modules are included in each interview.

Preload from previous wave	EHC entry interview month of previous wave	EHC entry interview month	Separation	Module

Routing of children modules

INFOBOX

Definition of auxiliary variables that capture children's age groups:

Many questions within the children module are posed only if children of a particular age group are present. In order to increase the clarity of the filters, auxiliary variables corresponding to these age groups are defined in the following table.

Key:

1. Age groups are not disjointed.
2. Field start year = Year in which field work of current wave was started. The field phase of this wave extends from the fall/winter of the field start year through the winter/spring of the following field start year.

Definition of CAPI children

INFOBOX

If no children were eligible to be CAPI children in the previous wave because there were no children between the ages of 8 and 15 in the household, but now there is such an eligible child, the youngest of these shall be interviewed as a CAPI child. If there were children in the previous wave who were eligible for the CAPI survey, the attempt shall be made again to interview them. Additionally, children who are younger than the first (and thus oldest) child previously selected for the CAPI survey and who are now 8 years or older shall be interviewed.

In detail, the selection of the CAPI children is defined as follows:

Child x (with the child number $x=1,\dots,15$) of the respondent is selected as CAPI child if one of the following conditions is met:

- if in the previous waves no child of the respondent had been selected as CAPI child and
 - Child x is the youngest child living in the respondent's household who was born 8-15 years before the first year of field work. If this condition applies to more than one child (same year of birth), the child is selected from the group of all eligible children who was first mentioned by the respondent.
- if in the previous waves a child of the respondent had already been selected as a CAPI child and
 - Child x was a CAPI child in the previous wave, currently lives in the respondent's household and was born 8-15 years before the first year of field work, or
 - Child x was not a CAPI child in the previous wave, currently lives in the respondent's household, is younger than the first CAPI child and was born at least 8 years before the first year of field work.

Formal condition:

$((d420 \neq 0 \ \& \ d(421+x)=1 \ \& \ ehc11kx \neq 1 \ \& \ ehc10kx=1,\dots,8 \ \& \ 8 \leq oij-ehc8kxy \leq 15) \mid$
 $(d420 \neq 0 \ \& \ d(421+x) \neq 1 \ \& \ ehc11kx \neq 1 \ \& \ ehc10kx=1,\dots,8 \ \& \ (oij-d420) \geq oij-ehc8kxy \geq 8) \mid$
 $(d420=0 \ \& \ ehc11kx \neq 1 \ \& \ ehc10kx=1,\dots,8 \ \& \ 8 \leq oij-ehc8kxy \leq 15$ (the youngest child, if more than one child fulfills this criteria (same year of birth), the first mentioned: $x < y$ for all $x=1,\dots,14$ and $y=2,\dots,15$) for $x=0,\dots,14$))

If child x (with the child identification number $x=1,\dots,15$) is selected as CAPI child, the variable $capikidx$ is set to 1.

The identification number $cidx=id+200+x$ for $capikidx=1$ allows for an explicit assignment of the data from the children's survey.

INFOBOX

In question 29 (sd34i_) and question 30 (sd35i_) the x refers to the type of employment. This x corresponds to the last digit of the following EHC-variables: ehc19i12, ehc19i13, ehc19i14, ehc19i15, ehc19i16. Accordingly, x has five possible values (x=1,...,5), such that

1 = employed part time

2 = internship, trainee, etc.

3 = marginal part-time employment, mini-job, "one-euro job"

4 = occasionally or irregularly employed

5 = other type of job.

Questions 29 (sd34i_) and 30 (sd35i_) are asked together for each type of activity indicated by the respondent, starting with the first mentioned activity and then for each additional type of activity mentioned. If a type of activity was not mentioned by the respondent in the EHC, the corresponding variables take on the value of -3 "not applicable".

INFOBOX

For the routing of the following questions, occupation at the time of the previous interview and current occupation were used as filter variables. In order to make routing instructions easier to read, the auxiliary variables *erw0*, *erw1*, and *erw2* have been generated, and are defined as follows:

1. Respondent was employed at the time of the previous wave:

erw0=1 if
ehc19i3mx(x=date of interview previous wave)=1 | ehc19i10mx(x=date of interview previous wave)=1 |
ehc19i11mx(x=date of interview previous wave)=1 | ehc19i12mx(x=date of interview previous wave)=1 |
ehc19i13mx(x=date of interview previous wave)=1 | ehc19i14mx(x=date of interview previous wave)=1 |
ehc19i15mx(x=date of interview previous wave)=1 | ehc19i16mx(x=date of interview previous wave)=1
else *erw0*=0

2. Respondent is employed at the time of the current wave:

erw1=1 if
(ehc19i10=1 | ehc19i11=1 | ehc19i12=1 | ehc19i13=1 | ehc19i14=1 | ehc19i15=1 | ehc19i16=1 | job22=2)
else *erw1*=0

3. Respondent is employed at several parallel jobs at the time of the current interview:

erw2=1 if
(ehc19i10+ehc19i11+ehc19i12+ehc19i13+ehc19i14+ehc19i15+ehc19i16+(job22=2)>1) |
(sd34i1=1 | sd34i2=1 | sd34i3=1 | sd34i4=1 | sd34i5=1)
else *erw2*=0

Note: *erw2* is defined differently in the CAPI programming, but the result is identical:
(ehc19i10+ehc19i11+ehc19i12+ehc19i13+ehc19i14+ehc19i15+ehc19i16 >1) or

If the respondent has a new partner and a partner number was not given to the previous partner (hpmt=1 & dpid=.), the personal identification number for the new partner is pid=id+101.

INFOBOX

Starting with wave 10, the fertility module has been shortened for female respondents of the oldest birth cohort (cohort 3) who no longer expect to have (further) children. The auxiliary variable hfrtk3 has been generated to identify these respondents in the question filters.

As a first step, i.e. for respondents expecting a child, hfrtk3 is coded as 1, if doby=1971,...,1973 & original_sex=2 & (frt27=2).

Respondents whose child x moved out in the previous wave ($(d1(18+x)=1 \ \& \ ehc10kx=9 \ \& \ ehc11kx=0)$ for $x=1, \dots, 15$)

**Question
224**

Variable
crn92

I would now like to know how you feel about the fact that [name child x (ehc7kxn) who moved out (d1(18+x)=1 & ehc10kx=9 & ehc11kx=0)] **no longer lives with you** [if more than one x=1,...,15 with (d1(18+x)=1 & ehc10kx=9 & ehc11kx=0): your children (names of all children (ehc7kxn) who moved out) no longer live with you].

I will not read aloud any answer choices. I would like you to simply explain what is important to you in this context. I would like to record your response so that I don't need to take detailed notes. The recording will be used exclusively as a tool for our analysis, and will be kept confidential until it is deleted after its transcription.

Do you consent to the recording of your response?

Int.: If respondent expresses doubts regarding data protection: You can be sure that no unauthorized persons will be given access to the recording. It will simply be transcribed and anonymized, if necessary, before being deleted.

Yes, respondent consents to recording. ☐ 1

No, respondent does not consent to recording. ☐ 2

Don't know ☐ -1

No answer ☐ -2

Respondents who have at least one child who moved out in the previous wave (at least one x=1,...,15 with (d1(18+x)=1 & ehc10kx=9 & ehc11kx=0))

Text 25

Thank you very much. I will now begin the recording. Please tell us how you feel about the fact that [name child x (ehc7kxn) who moved out (d1(18+x)=1 & ehc10kx=9 & ehc11kx=0)] **no longer lives with you** [if more than one x=1,...,15 with (d1(18+x)=1 & ehc10kx=9 & ehc11kx=0): your children (names of all children (ehc7kxn) who moved out) no longer live with you].

Int.: If respondent asks how much time is available: The program allows for a maximum of 3 minutes.

If respondent asks again what the question is about or what he/she should say (e.g., "What should I say about that" or "What do you mean exactly?"), the introduction is to be repeated in similar words: We would like to find out how respondents cope with their child(ren) moving out of the parental home, meaning: how you are managing it and/or how you feel about it.

Respondents who consented to the recording of their response (crn92=1)

Int.: Open the text field, give the laptop to the respondent, and ask them to enter their response.

Respondents who did not consent to the recording of their response, but are willing to enter their response directly into the laptop ($crn92=2$ & $crn93=1$)

Newborn module

INFOBOX

Questions 226 ($crn1kx$) to 231 ($crn6kx_$) are posed as a block first for the first child born since the previous interview, and then for each additional newborn.

The x in these variables corresponds to the child identification number. If the respondent, for example, already had two older children, and another child has been born since the previous wave, these questions are not posed for the first two children with the child identification number one ($x=1$) and two ($x=2$); these variables are coded -3 "does not apply". The following questions are then posed only for the newborn child ($x=3$) and the variables have valid values only for this case.

Question 226

Variable
 $crn1kx$

 $x=1, \dots, 15$

[At the first iteration: Now consider the child who was born after the previous interview [if more than one $x=1, \dots, 15$ with ($(d(28+x) \neq 1, 2, -1$ & $ehc7kxg=1, 2, -1$ & $ehc11kx=0$) & ($d0=1$ & ($oij-ehc8kxy \leq 1$) | ($d0=0$ & $oij-ehc8kxy \leq 2$))): the children [names (ehc7kxn)] of all children, to whom this condition applies] who were born after the previous interview.]

Questions 232 (crn37kx) to 246 (crn45kx_) are posed for each (relevant) child in blocks, i.e. all questions are posed first for the first child and then, in subsequent iterations, for each additional child.

The "x" in the variables refers to the child identification number. Questions 247 (crn31kx) to 256 (crn15kx_) are posed for each (relevant) child in blocks, i.e. all questions are posed first for the first child and then, in subsequent iterations, for each additional child.

The x in these variables refers to the child number. To illustrate: For example, a respondent has no contact to the child with the child number 1 and all filter conditions apply to the second child. The questions are not posed for child number 1 (x=1), such that the variables take on the value -3 "Does not apply". The questions are then posed for the child with the child number 2 (x=2), and the variables have valid values.

Unequal treatment of siblings

INFOBOX

The following questions focus on differences between siblings and the anchor respondent (and his/her partner) regarding parental bonds and parenting. Two siblings are to be selected and asked about each other in the children's survey. The selection criteria of the children are as follows:

- If no children or only one child in the household has been defined as a CAPI child ($\text{sum}(\text{capikidkx}) < 2$), the survey module will not be presented; a selection is not necessary.
- If two or more children in the household have been defined as CAPI children, the two youngest should be surveyed about each other. In order to select the two youngest, a ranking of birth year beginning with the youngest year should be arranged. If children ranked 2 or 3 have the same birth year, the selection is to be random.

Formal criterion: Two auxiliary variables fsk1 and fsk2 are defined for all CAPI children x ($\text{capikidkx}=1$). These variables represent the rank of the two youngest CAPI children according to descending birth year (ties are solved randomly).

CAPI children with position x ($\text{fsk1}=x, \text{fsk2}=x$) are selected as focus siblings.

Definition of target children for the parenting survey

INFOBOX

The selection of the children relevant for the parenting survey is defined as follows:

Child x is selected as a parenting survey child if one of the following conditions is met:

- Child x is a CAPI child
- Child x is a biological or adopted child, was born between 6 and 15 years before the start of fieldwork (and alive), lives exclusively outside the household, and is in contact with respondent
- Child x is 6-7 years old and lives with respondent in the same household

Formal condition: $\text{capikid}_x=1 \mid (\text{ehc9}_{kx}=1,2 \ \& \ \text{ehc11}_{kx}=0 \ \& \ \text{oj-ehc8}_{kxy} \geq 6 \ \& \ \text{oj-ehc8}_{kxy} \leq 15 \ \& \ \text{ehc10}_{kx} > 8 \ \& \ \text{crn16}_{kx}=1,\dots,6) \mid (\text{ag5}_{kx}=1 \ \& \ \text{ehc11}_{kx}=0 \ \& \ \text{ehc10}_{kx}=1,\dots,8).$

If child x (with $\text{cid } x=1,\dots,15$) is selected as a parenting survey child, the variable pqkx is set to 1.

The assignment of a parenting survey instrument to the respective children is clearly indicated by the identification number $\text{cid}_x=\text{id}+200+x$.

If child x (with child identification number $x = 1, \dots, 15$) is selected for the PAYA survey, the variable $youkx$ is set to 1.

The assignment of a PAYA survey instrument to the respective children is clearly indicated by the identification number $cidx = id + 200 + x$.

Question 279

Variable
 $cys1$

As children become adults, many things begin to change in their lives, which has an effect on the relationship their parents have with them. Starting this year, we would like to focus more on these changes. To this end, we have prepared a short, additional questionnaire concerning the relationship you have with your adult child [name $youkid$ ($ehc7kxn$ with $youkx = 1$)] [if more than one $youkid$ ($youkx = 1$ for more than one $x = 1, \dots, 15$): your adult children [names of all $youkids$]].

I will leave this questionnaire [if more than one $youkid$ ($youkx = 1$ for more than one $x = 1, \dots, 15$): these questionnaires] **here, so that you can fill it/them out at the end of this interview at your own pace.**

Is that okay for you?

Yes ☐ 1

No ☐ 2

Respondents with at least one child selected for the PAYA (at least one $x = 1, \dots, 15$ with $youkx = 1$)

Question 280

Variable
 $cys2$

The completed questionnaire [in case of consent for more than one $youkid$ ($youkx = 1$ for more than one $x = 1, \dots, 15$): The completed questionnaires] **can be sent back to us (we pay for postage) or I can pick it up here. Which would you prefer?**

Pick up ☐ 1

Send ☐ 2

Respondents who consented to the PAYA survey for at least one child ($cys1 = 1$).

Text 33

[If a return of the completed questionnaire is desired (cys=2):] **Please return the completed questionnaire to us at no charge.**

Int.: Label the PAYA questionnaire with the following information and hand to respondent:

Billing number: _____

Wave: [Address tranche]

List number: [rllistno]

Serial number: [rllfdnuo]

To be filled out by the surveyed person, check the box

Identification number anchor (=Household number): [id]

Parenting survey number: [cidx]

First name youkid: [ehc7kxn mit youkx=1]

Respondents who consented to the PAYA survey for at least one child (cys1=1).

INFOBOX

The selection of children for the PAYA survey for partners is defined as follows:

Partners will be selected to answer the PAYA survey regarding child x if the following criteria are fulfilled:

- Child x lives with the respondent and his/her partner in the same household, was born at least 16 years before the start of the panel, and was not older than 15 in wave 2.
- Child x is the respondent's and his/her partner's biological child, lives exclusively in another household, is in contact with the respondent's partner, was born at least 16 years before the start of the panel (and is still living), and was not older than 15 in wave 2.

Formal condition: $(hpc=1 \ \& \ oij-ehc8kxy \geq 16 \ \& \ ehc8kxy \geq 1994 \ \& \ ehc11kx=0 \ \& \ (ehc10kx=1, \dots, 8 \mid (ehc2py=1 \ \& \ ehx12kx=y \ \& \ ehc9kx=1 \ \& \ ehc10kx > 8 \ \& \ crn17kx=1, \dots, 69)))$.

When a partner is selected to answer the PAYA survey regarding child x (with child number $x=1, \dots, 15$), the variable $pyoukx$ is set to 1.

The assignment of a PAYA survey instrument to the respective children is clearly indicated by the identification number $cidx=id+200+x$.

Intergenerational relationships

INFOBOX

In order to improve the legibility of the filters and question texts, the following auxiliary variables were defined for the module Intergenerational Relationships:

d406	adoptive parents relevant	directly from the preloads
lmhh1	biol. mother in household at main residence (HH1) (1=yes, 0=no)	there is one x=1,...,20 with ehc23px=2 & ehc25px=1
lvhh1	biol. father in HH1 (1=yes, 0=no)	there is one x=1,...,20 with ehc23px=3 & ehc25px=1
amhh1	adoptive mother in HH1 (1=yes, 0=no)	there is one x=1,...,20 with ehc23px=4 & ehc25px=1
avhh1	adoptive father in HH1 (1=yes, 0=no)	there is one x=1,...,20 with ehc23px=5 & ehc25px=1
smhh1	stepmother in HH1 (1=yes, 0=no)	there is one x=1,...,20 with ehc23px=6 & ehc25px=1
svhh1	stepfather in HH1 (1=yes, 0=no)	there is one x=1,...,20 with ehc23px=7 & ehc25px=1

The following variables are subject to the conditions noted in column 4. In addition to the categories indicated, there is a "missing" category. Cases that cannot be assigned to any other category using the (previously) defined conditions are placed in the "missing" category. If new information useful for categorization arises out of the answers to the following questions, the auxiliary variables will be re-coded in each case. An overview of how the variables are set upon the end of the survey is included at the end of the module.

hm1=1	mother living	biol. mother relevant, in previous wave living and in household grid indicated, or adoptive mother relevant, in previous wave living and in household grid indicated	d325≠0 & ((d406=0 & lmhh1=1) (d406=1 & amhh1=1))

Vignette study: Distribution of work in partnerships

INFOBOX

Example vignettes are shown here in order to clearly illustrate the question format and presentation. No respondent was posed these exact vignettes.

The variation of vignettes was controlled externally and then applied to the questionnaire.

Each respondent received three vignettes. Two different answer formats were controlled by the preload `vig_ant`: `vig_ant=1` reports the share of the total workload, `vig_ant=2` the share of housework. The answer format remained the same across all three vignettes for each respondent.

The anchor respondent's partner was posed the same three vignettes together with the partner questionnaire.

A Technical Paper includes a more detailed description of the vignette study, available here: www.pairfam.de/dokumentation/technical-papers/.

Text 39

We are interested in which distribution of the total workload in a partnership is perceived to be appropriate. In the following, 3 example couples will be introduced.

For all couples, both partners are approximately 35 years old and have comparable education levels. Some couples may have children who are cared for by others (e.g., day care, school) while their parents are working.

Please indicate how appropriate you think the distribution of housework and paid employment (and child care if applicable) [answer format 2 (`vig_ant==2`): the distribution of housework] is among each couple.

There are no right or wrong answers. We are simply interested in your personal opinion.

I will now hand the computer to you, so that you can answer the next four questions independently.
