Notation key

Notation in filter	Meaning
&	AND
|	OR
x=1,2	x=1 OR x=2
x≠1,2	x≠1 AND x≠2
x=1,...,3	x=1 OR x=2 OR x=3

In the filter and question text:

Previous wave means: Reference to the wave of the previous year (if d0=1) or to the last wave that an interview took place (if no interview took place in the previous year, i.e. d0=0).

The dependent interviewing variables always contain the newest value, i.e. the value from W3 if d0=1, or the value from W2 if d0=0.

For filtering on sex we use the variable „sex" (question 1). In the dataset this variable is saved as original_sex. For data analyse please use the generated variable sex_gen.

P4

We would now like to know in which months you and your partner were having a relationship, if and when you were living together or were married. You see here a calendar with one column for every month between the last interview [First-time respondents (d0=2): EHC time period] and today. Also, your current partnership status is entered in the column labelled "now".

For each partner there are three lines, one for having a relationship, one for living together, and one for marriage or civil union.

We will proceed like this: You look at the screen and tell me what happened since the last interview [first-time respondents (d0=2): EHC time period], and I will enter the data. After we are finished, you can check that the information is correct.

Pop-Up 53: Respondents who did not indicate a month for an activity that was indicated in the previous wave at the time of interview: „In the last interview you indicated that you were engaged in [type of activity] on [date of interview previous wave (d5, d6)]. Are you sure that you no longer have been engaged in this activity since [date of interview previous wave]?" [Yes, delete activity][No, activity was engaged in on [date of interview previous wave]

Pop-Up 54: Respondents who indicated simultaneously „full-time employment" and „self-employment" such that the 2 episodes overlap completely: „You indicated that you are (if not „now": were) employed full-time and self-employed. If you pursue (if not „now": pursued) your self-employment on a full-time basis but are (were) not employed in another job elsewhere, only the activity „self-employment" should be marked. Are (if not „now": Were) you really engaged in both activities ? Yes= you are employed full-time and additionally self-employed. No=You are self-employed only. (Full-time employment will be deleted)." [Yes]–> continue with A2; [No]–> continue with A2 and the line „full-time employment" is deleted.

Routing partnership modules

Whether questions regarding partnership are posed depends on the current status of the respondent. There is a module for singles, one with questions regarding the current partnership, one about meeting a new partner, and one about separation from the ex-partner. The following overview shows which modules are included in each interview.

Routing Children Modules

INFOBOX
Definition of auxiliary variables that capture childrens' age groups:

Many questions within the children module are posed only if children of a particular age group are present. In order to increase the clarity of the filters, auxiliary variables corresponding to these age groups are defined in the following table.

Key:
1. Age groups are not disjointed.
2. Field start year = Year in which field work of current wave was started. The field phase of this wave extends from the fall/winter of the field start year through the winter/spring of the following field start year. This wave has the field start year 2014.

Definition CAPI-Children

If no children were eligible to be CAPI-children in the previous wave because there were no children between the ages of 8 and 15 in the household, but now there is such an eligible child, the youngest of these shall be interviewed as a CAPI-child. If there were children in the previous wave who were eligible for the CAPI survey, the attempt shall be made again to interview them. Additionally, children who are younger than the first (and thus oldest) child previously selected for the CAPI survey and who are now 8 years or older shall be interviewed.

In detail, the selection of the CAPI children is defined as follows:

Child x (with the child number x=1,...,15) of the respondent is selected as CAPI child if one of the following conditions is met:

- if in the previous waves no child of the respondent had been selected as CAPI child and

  - Child x is the youngest child living in the respondent's household who was born 8-15 years before the first year of field work. If this condition applies to more than one child (same year of birth), the child is selected from the group of all eligible children who was first mentioned by the respondent.

- if in the previous waves a child of the respondent had already been selected as a CAPI child and

  - Child x was a CAPI child in the previous wave, currently lives in the respondent's household and was born 8-15 years before the first year of field work, or

  - Child x was not a CAPI child in the previous wave, currently lives in the respondent's household, is younger than the first CAPI child and was born at least 8 years before the first year of field work.

Formal condition:

((d420≠0 & d(421+x)=1 & ehc11kx≠1 & ehc10kx=1,...,8 & 8≤oij-ehc8kxy≤15) |
(d420≠0 & d(421+x)≠1 & ehc11kx≠1 & ehc10kx=1,...,8 & (oij-d420)≥oij-ehc8kxy≥8) |
(d420=0 & ehc11kx≠1 & ehc10kx=1,...,8 & 8≤oij-ehc8kxy≤15 (the youngest child, if more than one child fulfills this criteria (same year of birth), the first mentioned: x<y for all x=1,...,14 and y=2,...,15) for x=0,...,14))

If child x (with the child identification number x=1,...,15) is selected as CAPI-child, the variable capikidkx is set to 1.

All children reported in the EHC are assigned a fixed person number: cidx=id+200+x.

INFOBOX

In question 31 (sd34i_) and question 32 (sd35i_) the x refers to the type of employment. This x corresponds to the last digit of the following EHC-variables: ehc19i12, ehc19i13, ehc19i14, ehc19i15, ehc19i16. Accordingly, x has five possible values (x=1,...,5), such that
1 = employed part time
2 = internship, trainee, etc.
3 = marginal part-time employment, mini-job, one-euro job when receiving unemployment benefits
4 = occasionally or irregularly employed
5 = other type of job.
The question 29 (sd34i_) and 30 (sd35i_) are asked together for each type of activity indicated by the respondent, starting with the first mentioned activity and then for each additional type of activity mentioned. If a type of activity was not mentioned by the respondent in the EHC, the corresponding variables take on the value of -3 "not applicable".

Newborn module

INFOBOX
The questions 205 (crn1kx) to 210 (crn6kx_) are posed in their entirety first for the first newborn and then for each additional newborn.
The x in these variables corresponds to the child identification number. If the respondent, for example, already had two older children, and a new child has arrived since the previous wave, the questions are not posed for the first two children with the child identification number one (x=1) and two (x=2); these variables are articulated as -3 "does not apply". The questions are posed only for the newborn (x=3) and the variables have valid values only for this case.

Question 205	[At the first iteration: Now consider the child who was born after the previous interview [if more than one x=1,...,15 with ((d(28+x)≠1,2,-1 & ehc7kxg=1,2,-1 & ehc11kx=0) & (d0=1 & (oij-ehc8kxy<=1) | (d0=0 & oij-ehc8kxy<=2))): the children [names (ehc7kxn)] of all children, to whom this condition applies], who were born after the previous interview.]

INFOBOX
The questions 230 (crn31kx) to 238 (crn15kx_) are posed for each (relevant) child in blocks, i.e. all questions are posed first for the first child and then, in subsequent iterations, for each additional child. The x in these variables refers to the child number. An example for illustration: The respondent has for example no contact to the child with the child number 1 and all filter conditions apply to the second child, the questions are not posed for child number 1 (x=1) such that the variables take on the value -3 "Does not apply". The questions are posed to the child with the child number 2 (x=2) and the variables have valid values.

Consent to parenting survey

Definition of children who belong to the target group of the parenting questionnaire.

INFOBOX

The selection of the children relevant for the parenting survey is defined as follows:

Child x is selected as a parenting-survey child if one of the following conditions is met:

- Child x is a CAPI-child

- Child x is a biological or adopted child, was born between 8 and 15 years before the start of fieldwork (and alive), lives exclusively outside the household, and is in contact with respondent

- Child x is 6 or 7 years old and lives with the respondent in the same HH.

Formal condition: capikidkx=1 |(ehc9kx=1,2 & ehc11kx=0 & oij-ehc8kxy≥8 & oij-ehc8kxy≤15 & ehc10kx>8 & crn16kx=1,...,6) | (ag5kx=1 & ehc11kx=0 & ehc10kx=1,...,8).
If child x (with child identification number x=1,...,15) is selected as a parenting-survey child, the variable pqkx is set to 1.

The assignment of a parenting survey instrument to the respective children is clearly indicated by the identification number cidx=id+200+x.

The following variables are subject to the conditions noted in column 4. In addition to the categories indicated, there is a "missing" category. Cases that cannot be assigned to any other category using the (previously) defined conditions are placed in the "missing" category. If new information useful for categorization arises out of the answers to the following questions, the auxiliary variables will be re-coded in each case. An overview of how the variables are set upon the end of the survey is included at the end of the module.
