Previous wave means: Reference to the wave of the previous year (if d0=1) or to the last wave that an interview took place (if no interview took place in the previous year, i.e. d0=0).

The dependent interviewing variables always contain the newest value, i.e. the value from W5 if d0=1, or the value from W4 if d0=0.

Demography - Event History Calendar (EHC)

INFOBOX

The following section shows the progression of the external EHC. Note that it does not involve questions that are directly represented by variables. Rather, d-variables (input variables) are preloaded for each individual question. From the responses to the questions, EHC variables (output variables) are made and shown in the EHC output section.

First-time respondents (d0=2) are asked in the EHC about a specific time period. This time period is called „EHC time period“ and spans the period between January of the field period of the previous wave and the date of the current interview.

In the partnership and children modules, the number of persons is shortened to X.

Partnership module: X=1,...,5

Children module: X=1,...,15

P1

[First-time respondents(d0=2): We would like to know how your life has progressed since [EHC time period] in the areas of partnership, children, residence, work, and career. This first section is about intimate relationships.]

You may remember that in [date of interview previous wave (d5, d6)] we talked about events in your life after the first interview in the domains of partnership, children, residence, job, and career. Again, we would like to know what has happened in your life since the last interview.

In the last interview it was recorded that you had a partner [respondents who were married but separated from this partner in the previous wave (d507=1): [respondents with a partner and married but separated from this partner in the previous wave (d7=1 & d507=1): and] were married] at the time of that interview. **He** [partner from previous wave female (d9=2): She][married but separated: This] **is listed here already. We would now like to know in which months you and your partner were having a relationship, if and when you were living together, or were married. You can see here a calendar with one column for each month between the last interview [First-time respondents (d0=2): EHC time period] and today. Also, your current partnership status is entered in the column labelled "now".

For each partner there are three lines, one for having a relationship, one for living together, and one for marriage or civil union.

We will proceed as follows: You will look at the screen and tell me what has happened since the last interview [first-time respondents (d0=2): EHC time period], and I will enter the data. After we are finished, you can check if the information I have entered is correct.

Note: For children who have already been mentioned by the respondent in the previous wave, text blocks with their name, birth date, and residences will be displayed in the table (d13, d14-d28, d44-d58, d59-d73, d74-d88, d89-d103, d104-d118, d327-d341). If the date of birth (d59-d103) or the place of residence (d119-d133) have not been indicated, the corresponding text blocks will not be displayed.
Clicking on a child leads to K3 with the data for the corresponding child.

Pop-Up 20: Respondents who did not click on every (or any) child in order to get to K3 and clicked on „Continue“: „Please return to the display and check the information for [name of all children/name of child from the previous wave not clicked on in K1 (d14-d28)].“ (OK)

Routing of partnership modules

Whether questions regarding partnership are posed depends on the current status of the respondent. There is a module for singles, one with questions regarding the current partnership, one about meeting a new partner, and one about separation from the ex-partner. The following overview shows which modules are included in each interview.

Routing of children modules

INFOBOX

Definition of auxiliary variables that capture children's age groups:

Many questions within the children module are posed only if children of a particular age group are present. In order to increase the clarity of the filters, auxiliary variables corresponding to these age groups are defined in the following table.

Key:

1. Age groups are not disjointed.
2. Field start year = Year in which field work of current wave was started. The field phase of this wave extends from the fall/winter of the field start year through the winter/spring of the following field start year.

Group Label	Formal notation	Verbal definition	Formal definition
Children newly born after the previous wave	ag1kx=1	Child x was born after the previous wave (child who was indicated in the EHC of this wave but not in the previous wave, who is still living, and who was born no more than 1 year before the field start year (2 years for respondents who skipped a wave)), or first-time respondent's child	(d(28+x)≠1,2,-1 & ehc7kxg=1,2,-1 & ehc11kx=0) & ((d0=1 & oij-ehc8kxy<=1) (d0=0 & oji-ehc8kxy<=2))
Infants	ag2kx=1	Child x was born in the field start year or the year thereafter (and is still living)	ehc11kx=0 & oji-ehc8kxy=0,-1
Toddlers	ag3kx=1	Child x was born one or two years before the field start year (and is still living)	ehc11kx=0 & oji-ehc8kxy=1,2
Pre-school children	ag4kx=1	Child x was born three to five years before the field start year (and is still living)	ehc11kx=0 & oji-ehc8kxy=3,4,5
Children aged 6-7	ag5kx=1	Child x was born six to seven years before the field start year (and is still living)	ehc11kx=0 & oij-ehc8kxy=6,7
Children under 16	ag6kx=1	Child x was born fewer than 16 years before the field start year (and is still living)	ehc11kx=0 & oji-ehc8kxy<16
Children under 18 (minors)	ag7kx=1	Child x was born fewer than 18 years before the field start year (and is still living)	ehc11kx=0 & oji-ehc8kxy<18
Children under 21	ag8kx=1	Child x was born fewer than 21 years before the field start year (and is still living)	ehc11kx=0 & oji-ehc8kxy<21

Definition of CAPI children

INFOBOX

If no children were eligible to be CAPI children in the previous wave because there were no children between the ages of 8 and 15 in the household, but now there is such an eligible child, the youngest of these shall be interviewed as a CAPI child. If there were children in the previous wave who were eligible for the CAPI survey, the attempt shall be made again to interview them. Additionally, children who are younger than the first (and thus oldest) child previously selected for the CAPI survey and who are now 8 years or older shall be interviewed.

In detail, the selection of the CAPI children is defined as follows:

Child x (with the child number $x=1,...,15$) of the respondent is selected as CAPI child if one of the following conditions is met:

- if in the previous waves no child of the respondent had been selected as CAPI child and
 - Child x is the youngest child living in the respondent's household who was born 8-15 years before the first year of field work. If this condition applies to more than one child (same year of birth), the child is selected from the group of all eligible children who was first mentioned by the respondent.
- if in the previous waves a child of the respondent had already been selected as a CAPI child and
 - Child x was a CAPI child in the previous wave, currently lives in the respondent's household and was born 8-15 years before the first year of field work, or
 - Child x was not a CAPI child in the previous wave, currently lives in the respondent's household, is younger than the first CAPI child and was born at least 8 years before the first year of field work.

Formal condition:

$((d420 \neq 0 \ \& \ d(421+x)=1 \ \& \ ehc11kx \neq 1 \ \& \ ehc10kx=1,...,8 \ \& \ 8 \leq oij-ehc8kxy \leq 15) \mid$
 $(d420 \neq 0 \ \& \ d(421+x) \neq 1 \ \& \ ehc11kx \neq 1 \ \& \ ehc10kx=1,...,8 \ \& \ (oij-d420) \geq oij-ehc8kxy \geq 8) \mid$
 $(d420=0 \ \& \ ehc11kx \neq 1 \ \& \ ehc10kx=1,...,8 \ \& \ 8 \leq oij-ehc8kxy \leq 15$ (the youngest child, if more than one child fulfills this criteria (same year of birth), the first mentioned: $x < y$ for all $x=1,...,14$ and $y=2,...,15$) for $x=0,...,14$))

If child x (with the child identification number $x=1,...,15$) is selected as CAPI child, the variable $capikidx$ is set to 1.

The identification number $cidx=id+200+x$ for $capikidx=1$ allows for an explicit assignment of the data from the children's survey.

INFOBOX

In question 35 (sd34i_) and question 36 (sd35i_) the x refers to the type of employment. This x corresponds to the last digit of the following EHC-variables: ehc19i12, ehc19i13, ehc19i14, ehc19i15, ehc19i16. Accordingly, x has five possible values (x=1,...,5), such that

1 = employed part time

2 = internship, trainee, etc.

3 = marginal part-time employment, mini-job, "Ein-Euro-Job"

4 = occasionally or irregularly employed

5 = other type of job.

Questions 35 (sd34i_) and 36 (sd35i_) are asked together for each type of activity indicated by the respondent, starting with the first mentioned activity and then for each additional type of activity mentioned. If a type of activity was not mentioned by the respondent in the EHC, the corresponding variables take on the value of -3 "not applicable".

INFOBOX

For the routing of the following questions, occupation at the time of the previous interview and current occupation were used as filter variables. In order to make routing instructions easier to read, the auxiliary variables erw0, erw1, and erw2 have been generated, and are defined as follows:

1. Respondent was employed at the time of the previous wave:

erw0=1 if

ehc19i3mx(x=date of interview previous wave)=1 | ehc19i10mx(x=date of interview previous wave)=1 |
ehc19i11mx(x=date of interview previous wave)=1 | ehc19i12mx(x=date of interview previous wave)=1 |
ehc19i13mx(x=date of interview previous wave)=1 | ehc19i14mx(x=date of interview previous wave)=1 |
ehc19i15mx(x=date of interview previous wave)=1 | ehc19i16mx(x=date of interview previous wave)=1
else erw0=0

2. Respondent is employed at the time of the current wave:

erw1=1 if

ehc19i10=1 | ehc19i11=1 | ehc19i12=1 | ehc19i13=1 | ehc19i14=1 | ehc19i15=1 | ehc19i16=1 | job22=2
else erw1=0

3. Respondent is employed at several parallel jobs at the time of the current interview:

erw2=1 if

(ehc19i10+ehc19i11+ehc19i12+ehc19i13+ehc19i14+ehc19i15+ehc19i16+(job22=2)>1) |
sd34i1=1 | sd34i2=1 | sd34i3=1 | sd34i4=1 | sd34i5=1

If the respondent has a new partner and a partner number was not given to the previous partner (hpmt=1 & dpid=.), the personal identification number for the new partner is pid=id+101.

I would now like to know how feel about the fact that [name child x (ehc7kxn)] who moved out (d1(18+x)=1 & ehc10kx=9 & ehc11kx=0)] no longer lives with you [if more than one x=1,...,15 with (d1(18+x)=1 & ehc10kx=9 & ehc11kx=0): your children (names of all children (ehc7kxn) who moved out) no longer live with you].

The recording will be used exclusively as a tool for our analysis, and will be kept confidential until it is deleted after its transcription.

Do you consent to the recording of your response?

Int.: If respondent expresses doubts regarding data protection: You can be sure that no unauthorized persons will be given access to the recording. It will simply be transcribed and anonymized, if necessary, before being deleted.

Newborn module

INFOBOX

The questions 205 (crn1kx) to 210 (crn6kx) are posed in their entirety first for the first child born since the previous interview, and then for each additional newborn.

The x in these variables corresponds to the child identification number. If the respondent, for example, already had two older children, and a new child has arrived since the previous wave, the questions are not posed for the first two children with the child identification number one (x=1) and two (x=2); these variables are articulated as -3 "does not apply". The following questions are posed only for the newborn child (x=3) and the variables have valid values only for this case.

Children up to 7 years

INFOBOX

The questions 233 (crn7kx) to 247 (crn45kx_) are posed for each (relevant) child in blocks, i.e. all questions are posed first for the first child and then, in subsequent iterations, for each additional child.

The “x” in the variables refers to the child identification number. If the respondent has, for example, an older child and a child born in 2013, the questions are not posed for the older child with the child identification number of 1 (x=1) and each of the variables are coded with the value of -3 “does not apply”. The questions are posed for the younger child and the variables are coded with valid values.

INFOBOX

The questions 250 (crn31kx) to 254 (crn95kx_) are posed for each (relevant) child in blocks, i.e. all questions are posed first for the first child and then, in subsequent iterations, for each additional child.

The x in these variables refers to the child number. An example for illustration: The respondent has for example no contact to the child with the child number 1 and all filter conditions apply to the second child, the questions are not posed for child number 1 (x=1) such that the variables take on the value -3 "Does not apply". The questions are posed to the child with the child number 2 (x=2) and the variables have valid values.

Definition of target children for the parenting survey

INFOBOX

The selection of the children relevant for the parenting survey is defined as follows:

Child x is selected as a parenting survey child if one of the following conditions is met:

- Child x is a CAPI child
- Child x is a biological or adopted child, was born between 8 and 15 years before the start of fieldwork (and alive), lives exclusively outside the household, and is in contact with respondent
- Child x is 6/7 years old and lives with respondent in the same household

Formal condition: $\text{capikidkx}=1 \mid (\text{ehc9kx}=1,2 \ \& \ \text{ehc11kx}=0 \ \& \ \text{oj-ehc8kxy} \geq 8 \ \& \ \text{oj-ehc8kxy} \leq 15 \ \& \ \text{ehc10kx} > 8 \ \& \ \text{crn16kx}=1,\dots,6) \mid (\text{ag5kx}=1 \ \& \ \text{ehc11kx}=0 \ \& \ \text{ehc10kx}=1,\dots,8).$

If child x (with child identification number $x=1,\dots,15$) is selected as a parenting survey child, the variable pqkx is set to 1.

The assignment of a parenting survey instrument to the respective children is clearly indicated by the identification number $\text{cidx}=\text{id}+200+x$.

INFOBOX

In order to improve the legibility of the filters and question texts, the following auxiliary variables were defined:

d406	adoptive parents relevant	directly from the preloads
lmhh1	biol. mother in household at main residence (HH1) (1=yes, 0=no)	there is one x=1,...,20 with ehc23px=2 & ehc25px=1
lvhh1	biol. father in HH1 (1=yes, 0=no)	there is one x=1,...,20 with ehc23px=3 & ehc25px=1
amhh1	adoptive mother in HH1 (1=yes, 0=no)	there is one x=1,...,20 with ehc23px=4 & ehc25px=1
avhh1	adoptive father in HH1 (1=yes, 0=no)	there is one x=1,...,20 with ehc23px=5 & ehc25px=1
smhh1	stepmother in HH1 (1=yes, 0=no)	there is one x=1,...,20 with ehc23px=6 & ehc25px=1
svhh1	stepfather in HH1 (1=yes, 0=no)	there is one x=1,...,20 with ehc23px=7 & ehc25px=1

The following variables are subject to the conditions noted in column 4. In addition to the categories indicated, there is a "missing" category. Cases that cannot be assigned to any other category using the (previously) defined conditions are placed in the "missing" category. If new information useful for categorization arises out of the answers to the following questions, the auxiliary variables will be re-coded in each case. An overview of how the variables are set upon the end of the survey is included at the end of the module.
