INFOBOX

This section serves the sole purpose of documenting the preparation of the interview (either the identification of the anchor or the reporting of a missed interview). The questions or instructions are addressed to the interviewer, who responds alone without the involvement of the respondent. No variables corresponding to these questions are in the dataset.

INFOBOX

The following section shows the progression of the external EHC. Note that it does not involve questions that are directly represented by variables. Rather, d-variables (input variables) are preloaded for each individual question. From the responses to the questions, ehc-variables (output variables) are made and shown in the EHC output section.

First-time respondents (d0=2) are asked in the EHC about a specific time period. This time period is called "EHC time period" and spans the time period between January of 2010 and the date of the interview.

In the partnership and children modules, the number of persons is shortened to X.

Partnership module: X=1,...,5

Children module: X=1,...,15

[First-time respondents(d0=2): We would like to know how your life has progressed since [EHC time period] in the areas of partnership, children, residence, work, and career. This first section is about intimate relationships.]

You may remember that in [date of interview previous wave (d5, d6)] we talked about events in your life after the first interview in the domains of partnership, children, residence, job, and career. Again, we would like to know what has happened in your life since the last interview.

This first section is about intimate relationships.

We would now like to know in which months you and your partner were having a relationship, if and when you were living together, or were married. You can see here a calendar with one column for each month between the last interview [First-time respondents (d0=2): EHC time period] and today. Also, your current partnership status is entered in the column labelled "now".

For each partner there are three lines, one for having a relationship, one for living together, and one for marriage or civil union.

We will proceed as follows: You will look at the screen and tell me what has happened since the last interview [first-time respondents (d0=2): EHC time period], and I will enter the data. After we are finished, you can check if the information I have entered is correct.

Pop-Up 51: Respondents who were involved in an activity in the month of the interview but not "now": You indicated that you were still involved in [type of activity X (from A1)] in [month of interview]. Is it correct that this activity ended this month?" (Yes/No) -> proceed with A2

Pop-Up 52: Respondents who indicated an activity for "now" but not for the month of the interview: You indicated that you are currently involved in [type of activity X (from A1)]. But you did not indicate that you are involved in this activity this month. Please think about when you started the activity and correct your answer" (OK)

Pop-Up 53: Respondents who did not indicate a month for an activity that was indicated in the previous wave at the time of interview: „In the last interview you indicated that you were engaged in [type of activity] on [date of interview previous wave (d5, d6)]. Are you sure that you no longer have been engaged in this activity since [date of interview previous wave]?" [Yes, delete activity][No, activity was engaged in on [date of interview previous wave]

Pop-Up 54: Respondents who indicated simultaneously „full-time employment“ and „self-employment“ such that the 2 episodes overlap completely: „You indicated that you are (if not „now“: were) employed full-time and self-employed. If you pursue (if not „now“: pursued) your self-employment on a full-time basis but are (were) not employed in another job elsewhere, only the activity „self-employment“ should be marked. Are (if not „now2: Were) you really engaged in both activities? Yes = you are employed full-time and additionally self-employed. No = You are self-employed only (Full-time employment will be deleted).“ [Yes]-> continue with A2; [No]-> continue with A2 and the line „full-time employment“ is deleted

Routing of partnership modules

Whether questions regarding partnership are posed depends on the current status of the respondent. There is a module for singles, one with questions regarding the current partnership, one about meeting a new partner, and one about separation from the ex-partner. The following overview shows which modules are included in each interview.

Preload from Previous Wave	EHC Entry Interview Month of Previous Wave	EHC Entry Interview Month	Separation	Module

Routing of children modules

INFOBOX

Definition of auxiliary variables that capture children's age groups:

Many questions within the children module are posed only if children of a particular age group are present. In order to increase the clarity of the filters, auxiliary variables corresponding to these age groups are defined in the following table.

Key:

1. Age groups are not disjointed.
2. Field start year = Year in which field work of current wave was started. The field phase of this wave extends from the fall/winter of the field start year through the winter/spring of the following field start year. This wave has the field start year 2015.

Group Label	Formal notation	Verbal definition	Formal definition
Children newly born after the previous wave	ag1kx=1	Child x was born after the previous wave (child who was indicated in the EHC of this wave but not in the previous wave, who is still living, and who was born no more than 1 year before the field start year (2 years for respondents who skipped a wave)), or first-time respondent's child	(d(28+x)≠1,2,-1 & ehc7kxg=1,2,-1 & ehc11kx=0) & ((d0=1 & oij-ehc8kxy<=1) (d0=0 & oji-ehc8kxy<=2))
Infants	ag2kx=1	Child x was born in the field start year or the year thereafter (and is still living)	ehc11kx=0 & oji-ehc8kxy=0,-1
Toddlers	ag3kx=1	Child x was born one or two years before the field start year (and is still living)	ehc11kx=0 & oji-ehc8kxy=1,2
Pre-school children	ag4kx=1	Child x was born three to five years before the field start year (and is still living)	ehc11kx=0 & oji-ehc8kxy=3,4,5

Definition of CAPI children

INFOBOX

If no children were eligible to be CAPI children in the previous wave because there were no children between the ages of 8 and 15 in the household, but now there is such an eligible child, the youngest of these shall be interviewed as a CAPI child. If there were children in the previous wave who were eligible for the CAPI survey, the attempt shall be made again to interview them. Additionally, children who are younger than the first (and thus oldest) child previously selected for the CAPI survey and who are now 8 years or older shall be interviewed.

In detail, the selection of the CAPI children is defined as follows:

Child x (with the child number $x=1,\dots,15$) of the respondent is selected as CAPI child if one of the following conditions is met:

- if in the previous waves no child of the respondent had been selected as CAPI child and
 - Child x is the youngest child living in the respondent's household who was born 8-15 years before the first year of field work. If this condition applies to more than one child (same year of birth), the child is selected from the group of all eligible children who was first mentioned by the respondent.
- if in the previous waves a child of the respondent had already been selected as a CAPI child and
 - Child x was a CAPI child in the previous wave, currently lives in the respondent's household and was born 8-15 years before the first year of field work, or
 - Child x was not a CAPI child in the previous wave, currently lives in the respondent's household, is younger than the first CAPI child and was born at least 8 years before the first year of field work.

Formal condition:

$((d420 \neq 0 \ \& \ d(421+x)=1 \ \& \ ehc11kx \neq 1 \ \& \ ehc10kx=1,\dots,8 \ \& \ 8 \leq oij-ehc8kxy \leq 15) \mid$
 $(d420 \neq 0 \ \& \ d(421+x) \neq 1 \ \& \ ehc11kx \neq 1 \ \& \ ehc10kx=1,\dots,8 \ \& \ (oij-d420) \geq oij-ehc8kxy \geq 8) \mid$
 $(d420=0 \ \& \ ehc11kx \neq 1 \ \& \ ehc10kx=1,\dots,8 \ \& \ 8 \leq oij-ehc8kxy \leq 15 \text{ (the youngest child, if more than one child fulfills this criteria (same year of birth), the first mentioned: } x < y \text{ for all } x=1,\dots,14 \text{ and } y=2,\dots,15 \text{ for } x=0,\dots,14)))$

If child x (with the child identification number $x=1,\dots,15$) is selected as CAPI child, the variable $capikidx$ is set to 1.

INFOBOX

All children reported in the EHC are assigned a fixed person number: $cidx=id+200+x$.

INFOBOX

In question 33 (sd34i_) and question 34 (sd35i_) the x refers to the type of employment. This x corresponds to the last digit of the following EHC-variables: ehc19i12, ehc19i13, ehc19i14, ehc19i15, ehc19i16. Accordingly, x has five possible values (x=1,...,5), such that

1 = employed part time

2 = internship, trainee, etc.

3 = marginal part-time employment, mini-job, one-euro job when receiving unemployment benefits

4 = occasionally or irregularly employed

5 = other type of job.

Questions 27 (sd34i_) and 28 (sd35i_) are asked together for each type of activity indicated by the respondent, starting with the first mentioned activity and then for each additional type of activity mentioned. If a type of activity was not mentioned by the respondent in the EHC, the corresponding variables take on the value of -3 "not applicable".

INFOBOX

For the routing of the following questions, occupation at the time of the previous interview and current occupation were used as filter variables. In order to make routing instructions easier to read, the auxiliary variables *erw0*, *erw1*, and *erw2* have been generated, and are defined as follows:

1. Respondent was employed at the time of the previous wave:

erw0=1 if

ehc19i3mx(*x*=date of interview previous wave)=1 | *ehc19i10mx*(*x*=date of interview previous wave)=1 |

ehc19i15mx(*x*=date of interview previous wave)=1 | *ehc19i16mx*(*x*=date of interview previous wave)=1
else *erw0*=0

2. Respondent is employed at the time of the current wave:

ehc19i10=1 | *ehc19i11*=1 | *ehc19i12*=1 | *ehc19i13*=1 | *ehc19i14*=1 | *ehc19i15*=1 | *ehc19i16*=1 | *job22*=2
else *erw1*=0

3. Respondent is employed at several parallel jobs at the time of the current interview:

erw2=1 if

(*ehc19i10*+*ehc19i11*+*ehc19i12*+*ehc19i13*+*ehc19i14*+*ehc19i15*+*ehc19i16*+(*job22*=2)>1) |
sd34i1=1 | *sd34i2*=1 | *sd34i3*=1 | *sd34i4*=1 | *sd34i5*=1

Newborn module

INFOBOX

The questions 211 (crn1kx) to 216 (crn6kx) are posed in their entirety first for the first child born since the previous interview, and then for each additional newborn.

The x in these variables corresponds to the child identification number. If the respondent, for example, already had two older children, and a new child has arrived since the previous wave, the questions are not posed for the first two children with the child identification number one (x=1) and two (x=2); these variables are articulated as -3 "does not apply". The following questions are posed only for the newborn child (x=3) and the variables have valid values only for this case.

The questions 217 (crn7kx) to 232 (crn45kx_) are posed for each (relevant) child in blocks, i.e. all questions are posed first for the first child and then, in subsequent iterations, for each additional child.

Health

INFOBOX

The questions 233 (crn31kx) to 241 (crn15kx_) are posed for each (relevant) child in blocks, i.e. all questions are posed first for the first child and then, in subsequent iterations, for each additional child.

The x in these variables refers to the child number. An example for illustration: The respondent has for example no contact to the child with the child number 1 and all filter conditions apply to the second child, the questions are not posed for child number 1 (x=1) such that the variables take on the value -3 "Does not apply". The questions are posed to the child with the child number 2 (x=2) and the variables have valid values.

**Question

Unequal treatment of siblings

INFOBOX

The following questions focus on differences of the bonds and upbringing between the anchor respondent (or his/her partner) and children. Two siblings are to be selected and asked about each other in the children's survey. The selection criteria of these children are as follows:

- If no children or only one child in the household has been defined as a CAPI child ($\text{sum}(\text{capikidkx}) < 2$), the survey module will not be presented; a selection is not necessary.
- If two or more children in the household have been defined as CAPI children, the two youngest should be surveyed about each other. In order to select the two youngest, a ranking of birth year beginning with the youngest year should be arranged. If children ranked 2 or 3 have the same birth year, the selection is to be random.

Formal criterium: The auxiliary variable fskx is defined for all x with $(\text{capikidkx}) = 1$. The variable fskx correlates with the descending ranking of CAPI children by birth year (ties are deleted randomly).

CAPI children with $\text{fskx} = 1, 2$ are selected as focus siblings.

Definition of target children for the parenting survey

INFOBOX

The selection of the children relevant for the parenting survey is defined as follows:

Child x is selected as a parenting survey child if one of the following conditions is met:

- Child x is a CAPI child
- Child x is a biological or adopted child, was born between 8 and 15 years before the start of fieldwork (and alive), lives exclusively outside the household, and is in contact with respondent
- Child x is 6/7 years old and lives with respondent in the same household

Formal condition: $\text{capikidkx}=1 \mid (\text{ehc9kx}=1,2 \ \& \ \text{ehc11kx}=0 \ \& \ \text{oj-ehc8kxy} \geq 8 \ \& \ \text{oj-ehc8kxy} \leq 15 \ \& \ \text{ehc10kx} > 8 \ \& \ \text{crn16kx}=1,\dots,6) \mid (\text{ag5kx}=1 \ \& \ \text{ehc11kx}=0 \ \& \ \text{ehc10kx}=1,\dots,8).$

If child x (with child identification number $x=1,\dots,15$) is selected as a parenting survey child, the variable pqkx is set to 1.

The assignment of a parenting survey instrument to the respective children is clearly indicated by the identification number $\text{cidx}=\text{id}+200+x$.

Question 264

Variable

We would like to ask you some additional questions about important aspects of the relationship between mother [male respondent ($\text{sex}=1$): father] and child. We want to reflect on your relationship with [name pqkid (ehc7kxn with $\text{pqkx}=1$)] [in case of consent for more than one child-interview ($\text{pqkx}=1$ for more than one $x=1,\dots,15$): your children [names all pqkid]] in this survey. For this purpose, we have developed a questionnaire that we would like for you to fill out. I'll leave the questionnaire [in case of consent for more than one pqkid ($\text{pqkx}=1$ for more than one $x=1,\dots,15$): the questionnaires] here and you can fill it out after our interview. Is that ok?

Yes ☐ 1

No ☐ 2

Question 265

Parenting survey number: [cidx]

First name pqkid: [ehc7kxn with pqkx=1]

Respondents who consented to the children's and parenting survey for at least one child (cpas1=1)

INFOBOX

The selection of children for the parenting survey for partners is defined as follows:

Partners will be selected to answer the parenting survey regarding child x if the following criteria are fulfilled:

- Child x is a CAPI child or 6 or 7 years old and lives with the respondent in the same HH.
- Respondent and partner live in the same HH.

Formal condition: hpc=1 & (capikidkx=1 | (ag5kx=1 & ehc11kx=0 & ehc10kx=1,...,8)).

When a partner is selected to answer the parenting survey regarding child x (with child number x=1,...,15), the variable pqpqx will be coded 1.

The assignment of a parenting survey instrument to the respective children is clearly indicated by the identification number cidx=id+200+x.

Consent to the grandparent survey

Text 34

We would like to invite:

- [if more information on mother available (hm3=1)] **your mother** [if more information on father, stepfather or stepmother available (hsm3=1) (hv3=1 | hsv3=1 | hsm3=1): and]
- [if more information on father available (hv3=1)] **your father** [if more information on stepmother or stepfather available (hsm3=1) (hsv3=1 | hsm3=1): and]

- [if more information on stepmother available (hsm3=1)] **your father's partner**

to participate in our survey with a written questionnaire on the topic of grandchildren. This questionnaire is decidedly shorter than in the past; the main focus is on the relationship between grandparents and grandchildren.

Respondents who live together in the same household with at least one biological or adopted child under the age of 16, who have contact to at least one parent, and are not former CAPI children (hnk>0 & d0≠2 & HhGr≠1 & (at least one x=1,...,15 with ehc9kx=1,2 & ehc11kx=0 & ehc10kx=1,...,8 & ag6kx=1))

INFOBOX

The selection criteria of the focal grandchildren of the grandparent survey are as follows:

The youngest biological or adopted grandchild under the age of 16 living in the anchor household.

Formal criterium: ehc8kxy is at a minimum for all $x=1, \dots, 15$, with ehc9kx=1,2 & ehc11kx=0 & ehc10kx=1, ..., 8 & ag6kx=1. Should this specification be valid for more than one child, the first child mentioned by the anchor respondent, i.e., the child x [name of child x (ehc7kxn)] for whom $x < y$ für alle $x=1, \dots, 14$ und $y=2, \dots, 15$ is additionally valid.

Once child x (with child identification number $x=1, \dots, 15$) is chosen as the focal grandchild, the variable gckx is coded 1.

The assignment of the parenting survey concerning the respective focal children is unique according to the person ID number $cidx=id+200+x$.
