Preface

Codebook identifiers

Official year of interview oij=2018

Respondent groups

Three groups of respondents are posed further questions beyond the standard question program:

Former CAPI children are the children of other anchor respondents who previously participated in the children's CAPI survey and are now interviewed every year as anchor respondents themselves.

First-time respondents are former CAPI children who are participating in the current wave for the first time as anchor respondents.

Refreshment sample respondents belong to the group of respondents part of a new sampling who are being interviewed for the first time in Wave 11 of the pairfam panel.

Notation key

Notation in filter	Meaning
&	AND

In the filter and question text:

Previous wave means: Reference to the wave of the previous year (if d0=1) or to the last wave that an interview took place (if no interview took place in the previous year, i.e. d0=0).

The dependent interviewing variables always contain the newest value, i.e. the value from the previous wave if d0=1, or the value from the last wave of participation if d0=0.

Demography - Event History Calendar (EHC)

INFOBOX

The following section shows the progression of the external EHC. Note that it does not involve questions that are directly represented by variables. Rather, d-variables (input variables) are preloaded for each individual question. From the responses to the questions, EHC variables (output variables) are made and shown in the EHC output section.

First-time and refreshment sample respondents (d0=2,3) are asked in the EHC about a specific time period. This time period is called „EHC time period“ and spans the period between January of the field period of the previous wave and the date of the current interview.

In the partnership and children modules, the number of persons is shortened to X.

Partnership module: X=1,...,5

Children module: X=1,...,15

You may remember that in [date of interview previous wave (d5, d6)] we talked about events in your life after the first interview in the domains of partnership, children, residence, job, and career. Again, we would like to know what has happened in your life since the last interview.

This first section is about intimate relationships.

Int.: For respondents interviewed for the first time: Due to technical reasons, only the time since [EHC time period] can be recorded here.

[Not first-time respondents (d0≠2,3) and without partner in the previous wave (d7=2 & d507≠1): Please tell me with whom you have been together since the last interview.]

In the last interview it was recorded that you had a partner [respondents who were married but separated from this partner in the previous wave (d507=1): [respondents with a partner and married but separated from this partner in the previous wave (d7=1 & d507=1): and] were married] at the time of that interview. **He** [partner from previous wave female (d9=2): She][married but separated: This] **is listed here already. If respondent does not indicate month and year: "Please try to indicate the date as precisely as possible. If you don't remember exactly, please try to tell me at least the season and year, or only the year."

If the anchor can only remember the season, please enter the following numbers in the field "month":

Respondents who had a partner in the previous wave or in the time between the previous and current waves or who were married in the previous wave (d7=1 | P2="Yes" | d507=1)

Note: At this question a table with several rows appears in which up to five partners (name and sex of partner) the respondent was/is with between the previous and current waves can be entered. If a partner had been named in the previous wave, this person's name (d8), sex (d9), and date of birth (d397, d398, d317) are shown in the first row. If the sex is not indicated (d9≠1,2), no sex will be shown. If no date of birth was indicated (d397, d398, d317=0), "0" is shown.

Pop-Up 1: Respondents who indicated an invalid date of birth in P3 for the partner from the previous wave: "Please enter a valid value for the day [if month invalid: 'month'; if year invalid: 'year'] of birth." (OK)

Pop-Up 2: Respondents who changed name, sex, or date of birth of a partner from the previous wave in P3: "You made changes in the data on your partner from the last survey. Is this really the partner from the last survey?" (Yes/No) -> "Yes" + "Continue": proceed with P3 and changes will be saved; "No" + "Continue": proceed with P3, no changes

Pop-Up 3: Respondents who failed to enter a name for a partner in P3: "Please enter a name for partner [partner number]." (OK)

P4

We would now like to know in which months you and your partner were having a relationship, if and when you were living together, or were married. You can see here a calendar with one column for each month between the last interview [First-time and refreshment sample respondents (d0=2,3): EHC time period] and today. Also, your current partnership status is entered in the column labeled "now".

[Refreshment sample respondents (d0=3): If you have been together with your partner before [EHC time period], you can report this later. For now, we are only interested in the time since [EHC time period].

For each partner there are three lines, one for having a relationship, one for living together, and one for marriage or civil union.

We will proceed as follows: You will look at the screen and tell me what has happened since the last interview [first-time and refreshment sample respondents (d0=2,3): EHC time period], and I will enter the data. After we are finished, you can check if the information I have entered is correct.

Navigation: "Go back": proceed with P3; "Continue": proceed with P5

Respondents who had a partner in the previous wave or in the time between the previous and current wave, or who were married in the previous wave (d7=1 | P2="Yes" | d507=1)

In which months did you and [name of partner X] live together?

In which months were you and [name of partner X] married [same-sex partner (from P3): married or in a civil union]?

Figure: Example of a partner calendar in the EHC

The screenshot shows the EHC partner calendar interface. It features a grid for three partners: Marion (Weiblich), Stefanie (Weiblich), and Lisa (Weiblich). Each partner has three rows for 'Beziehung' (Relationship), 'Wohnen' (Living together), and 'Ehe' (Marriage). The columns represent months from January to October, plus 'Jetzt' (Now). Marion's 'Beziehung' row has a green box with '01.2011'. Marion's 'Wohnen' row has a blue box with '01.2011'. Marion's 'Ehe' row has a yellow box with '01.2011'. Stefanie and Lisa have empty rows. At the bottom, there is a text input field 'In welchen Monaten waren Sie mit Marion zusammen?' and buttons: 'Zurück', 'Weiteren Partner hinzufügen', 'Keine Änderung', 'Alles löschen', and 'Angaben vollständig, weiter'.

Navigation: "Go back": proceed with P3; "Add another partner": proceed with P3; "No change": Preloads are accepted for the entire time span. Name and sex of the partners will be taken from P3. The "Data complete, continue" button is activated only if the "finished" box to the right of every line is checked.

Pop-Up 8: Respondents who indicated being with more than one partner for the same month [overlap in dwelling "living together"; overlap in marriage/civil union "marriage/civil union"]: "There is an overlap (red bar) in the month(s) of [list of month names in which the overlap occurs] for [name of partner X] 'relation' [for living together: 'living together'; for marriage/civil union: 'marriage/civil union'] and [name of partner Y] 'relation' [for living together: 'living together'; for marriage/civil union: 'marriage/civil union']. Do you want to correct this?" (Yes/No) -> proceed with P5

Pop-Up 9: Respondents who for a partner in one month indicated living together with him/her but did not indicate having a relationship with that partner: "Living together without having a relationship with [name of partner X]?" (Yes/No) -> proceed with P5

Pop-Up 10: Respondents who indicated being married to a partner in one month but did not indicate having a relationship with that partner in that month: "You indicated that you married [name of partner X] in [month and year of marriage], but that you were not in a relationship with him [partner female: her]. Routing of partnership modules

Whether questions regarding partnership are posed depends on the current status of the respondent. There is a module for singles, one with questions regarding the current partnership, one about meeting a new partner, and one about separation from the ex-partner. The following overview shows which modules are included in each interview.

Preload from previous wave	EHC entry interview month of previous wave	EHC entry interview month	Separation	Module

Routing of children modules

Definition of auxiliary variables that capture children's age groups:

Many questions within the children module are posed only if children of a particular age group are present. In order to increase the clarity of the filters, auxiliary variables corresponding to these age groups are defined in the following table.

Key:

1. Age groups are not disjointed.
2. Field start year = Year in which field work of current wave was started. The field phase of this wave extends from the fall/winter of the field start year through the winter/spring of the following field start year.

Group Label	Formal notation	Verbal definition	Formal definition
Children newly born after the previous wave	ag1kx=1	Child x was born after the previous wave (child who was indicated in the EHC of this wave but not in the previous wave, who is still living, and who was born no more than 1 year before the field start year (2 years for respondents who skipped a wave), or first-time respondent's child)	$(d(28+x) \neq 1,2,-1 \text{ \& } ehc7kxg=1,2,-1 \text{ \& } ehc11kx=0) \text{ \& } ((d0=1 \text{ \& } oij-ehc8kxy \leq 1) \mid (d0=0 \text{ \& } oij-ehc8kxy \leq 2) \mid d0=2,3)$
Infants	ag2kx=1	Child x was born in the field start year or the year thereafter (and is still living)	$ehc11kx=0 \text{ \& } oji-ehc8kxy=0,-1$
Toddlers	ag3kx=1	Child x was born one or two years before the field start year (and is still living)	$ehc11kx=0 \text{ \& } oji-ehc8kxy=1,2$
Pre-school children	ag4kx=1	Child x was born three to five years before the field start year (and is still living)	$ehc11kx=0 \text{ \& } oji-ehc8kxy=3,4,5$
Children aged 6-7	ag5kx=1	Child x was born six to seven years before the field start year (and is still living)	$ehc11kx=0 \text{ \& } oij-ehc8kxy=6,7$
Children under 16	ag6kx=1	Child x was born fewer than 16 years before the field start year (and is still living)	$ehc11kx=0 \text{ \& } oji-ehc8kxy < 16$
Children under 18 (minors)	ag7kx=1	Child x was born fewer than 18 years before the field start year (and is still living)	$ehc11kx=0 \text{ \& } oji-ehc8kxy < 18$
Children under 21	ag8kx=1	Child x was born fewer than 21 years before the field start year (and is still living)	$ehc11kx=0 \text{ \& } oji-ehc8kxy < 21$

Definition of CAPI children

INFOBOX

If no children were eligible to be CAPI children in the previous wave because there were no children between the ages of 8 and 15 in the household, but now there is such an eligible child (or children), the youngest of these shall be interviewed as a CAPI child. If there were children in the previous wave who were eligible for the CAPI survey, the attempt shall be made again to interview them. Additionally, children who are younger than the first (and thus oldest) child previously selected for the CAPI survey and who are now 8 years or older shall be interviewed.

In detail, the selection of the CAPI children is defined as follows:

Child x (with the child number $x=1,\dots,15$) of the respondent is selected as CAPI child if one of the following conditions is met:

- if in the previous waves no child of the respondent had been selected as CAPI child and
 - Child x is the youngest child living in the respondent's household who was born 8-15 years before the first year of field work. If this condition applies to more than one child (same year of birth), the child is selected from the group of all eligible children who was first mentioned by the respondent.
- if in the previous waves a child of the respondent had already been selected as a CAPI child and
 - Child x was a CAPI child in the previous wave, currently lives in the respondent's household and was born 8-15 years before the first year of field work, or
 - Child x was not a CAPI child in the previous wave, currently lives in the respondent's household, is younger than the first CAPI child and was born at least 8 years before the first year of field work.

Formal condition:

$((d420 \neq 0 \ \& \ d(421+x)=1 \ \& \ ehc11kx \neq 1 \ \& \ ehc10kx=1,\dots,8 \ \& \ 8 \leq oij-ehc8kxy \leq 15) \mid$
 $(d420 \neq 0 \ \& \ d(421+x) \neq 1 \ \& \ ehc11kx \neq 1 \ \& \ ehc10kx=1,\dots,8 \ \& \ (oij-d420) > oij-ehc8kxy \geq 8) \mid$
 $(d420=0 \ \& \ ehc11kx \neq 1 \ \& \ ehc10kx=1,\dots,8 \ \& \ 8 \leq oij-ehc8kxy \leq 15))$ (the youngest child, if more than one child fulfills this criteria (same year of birth), the first mentioned: $x < y$ for all $x=1,\dots,14$ and $y=2,\dots,15$) for $x=0,\dots,14$))

If child x (with the child identification number $x=1,\dots,15$) is selected as CAPI child, the variable $capi-kidkx$ is set to 1.

All children mentioned in the EHC receive the following unchanging identification number: $cidx=id+200+x$.

Auxiliary variables for intergenerational relationships

In order to improve the legibility of the filters and question texts, the following auxiliary variables were defined:

d406	adoptive parents relevant	directly from the preloads
lmhh1	biol. mother in household at main residence (HH1) (1=yes, 0=no)	there is one x=1,...,20 with ehc23px=2 & ehc25px=1
lvhh1	biol. father in HH1 (1=yes, 0=no)	there is one x=1,...,20 with ehc23px=3 & ehc25px=1
amhh1	adoptive mother in HH1 (1=yes, 0=no)	there is one x=1,...,20 with ehc23px=4 & ehc25px=1
avhh1	adoptive father in HH1 (1=yes, 0=no)	there is one x=1,...,20 with ehc23px=5 & ehc25px=1
smhh1	stepmother in HH1 (1=yes, 0=no)	there is one x=1,...,20 with ehc23px=6 & ehc25px=1
svhh1	stepfather in HH1 (1=yes, 0=no)	there is one x=1,...,20 with ehc23px=7 & ehc25px=1

The following variables are subject to the conditions noted in column 4. In addition to the categories indicated, there is a "missing" category. Cases that cannot be assigned to any other category using the (previously) defined conditions are placed in the "missing" category. If new information useful for categorization arises out of the answers to the following questions, the auxiliary variables will be re-coded in each case. An overview of how the variables are set upon the end of the survey is included at the end of the module.

INFOBOX

In Question 43 (sd34i_) and Question 44 (sd35i_) the x refers to the type of employment. This x corresponds to the last digit of the following EHC-variables: ehc19i12, ehc19i13, ehc19i14, ehc19i15, ehc19i16. Accordingly, x has five possible values (x=1,...,5):

1 = employed part time

2 = internship, trainee, etc.

3 = marginal part-time employment, mini-job, "one-euro job"

4 = occasionally or irregularly employed

5 = other type of job.

Questions 43 (sd34i_) and 44 (sd35i_) are asked together for each type of activity indicated by the respondent, starting with the first mentioned activity and then for each additional type of activity mentioned. If a type of activity was not mentioned by the respondent in the EHC, the corresponding variables take on the value of -3 "not applicable".

INFOBOX

For the routing of the following questions, occupation at the time of the previous interview and current occupation were used as filter variables. In order to make routing instructions easier to read, the auxiliary variables erw0, erw1, and erw2 have been generated, and are defined as follows:

1. Respondent was employed at the time of the previous wave:

erw0=1 if

ehc19i3mx(x=date of interview previous wave)=1 | ehc19i10mx(x=date of interview previous wave)=1 |
 ehc19i11mx(x=date of interview previous wave)=1 | ehc19i12mx(x=date of interview previous wave)=1 |
 ehc19i13mx(x=date of interview previous wave)=1 | ehc19i14mx(x=date of interview previous wave)=1 |
 ehc19i15mx(x=date of interview previous wave)=1 | ehc19i16mx(x=date of interview previous wave)=1
 else erw0=0

2. Respondent is employed at the time of the current wave:

erw1=1 if

(ehc19i10=1 | ehc19i11=1 | ehc19i12=1 | ehc19i13=1 | ehc19i14=1 | ehc19i15=1 | ehc19i16=1 | job22=2)
 else erw1=0

3. Respondent is employed at several parallel jobs at the time of the current interview:

erw2=1 if

(ehc19i10+ehc19i11+ehc19i12+ehc19i13+ehc19i14+ehc19i15+ehc19i16+(job22=2)>1) |
 (sd34i1=1 | sd34i2=1 | sd34i3=1 | sd34i4=1 | sd34i5=1)
 else erw2=0

Note: erw2 is defined differently in the CAPI programming, but the result is identical:
 (ehc19i10+ehc19i11+ehc19i12+ehc19i13+ehc19i14+ehc19i15+ehc19i16 >1) or
 (ehc19i10+ehc19i11+ehc19i12+ehc19i13+ehc19i14+ehc19i15+ehc19i16 = 1) and job22=2 or

Past partnerships (refreshment sample only)

INFOBOX

In the following section, all relationships that took place outside of the EHC are recorded retrospectively. This also includes previous relationships with partners that were mentioned in the EHC, but not the current partner. The variable rtr1px_n captures up to a maximum of 5 partners mentioned in the EHC, using the same position from the EHC in the retrospective module (in rtr1px_n). This means for x=1,...,5:
rtr1pxn=ehc1pxn and rtr1pxg=ehc1pxg, if x-th partner mentioned in EHC (if ehc1pxn≠3),
rtr1pxn=-3 and rtr1pxg=-3, if x-th partner not mentioned in EHC (if ehc1pxn=-3).

Ex-partners who have already been mentioned in the EHC are labeled as rtr1pxehc=1.

Text 17

[Respondents who mentioned at least one partner in the EHC (ehc1pg=1,2,-1,-2): We have already spoken about your relationships over the past few years.] **Now we would like to ask you about your relationships from the age of 14 up to the beginning of the calendar, until [EHC time period]** [respondents with a partner (hp=1): with the exception of your current relationship].

With whom did you have a relationship? We are interested in all relationships that were important to you. This means relationships that lasted longer than 6 months, or those in which you lived with your partner, or those that led to the birth of a child, or those that were important to you for other reasons.

All partners previously mentioned in the calendar are listed here.

INFOBOX

Question 100 (sd5ezb_) to Question 104 (sd6ez) are only posed to refreshment sample respondents whose current relationship extends beyond the EHC time frame. Questions 100 to 104 concern relationship episodes with the current partner. Z represents the z-th relationship episode. For each episode, the beginning (Question 100, sd5ezb), whether it ended in separation (Question 104, sd6ez) and if yes, when this occurred (Question 102, sd5eze) are collected. The wording of the question text for the first episode differs slightly from that of the questions regarding subsequent episodes (see Question 100 and 103, as well as 101 and 104).
For respondents whose current relationship began during the EHC time frame but who had previously been in a relationship with the same partner (pa30=1), sd6e1 is labeled as 1 (without posing the question) and are dealt with in the following iterations (z≥2) along with respondents whose relationship existed at the beginning of the EHC.

Cohabitation episodes (refreshment sample only)

INFOBOX

Question 105 (sd8ezb_) to Question 110 (sd7ez) concern cohabitation episodes with the current partner. Z represents the z-th cohabitation episode. The variable sd7ez records whether such a cohabitation episode existed. For each episode, the beginning (sd8ezb_) and the end (sd8eze_) are collected. The wording of the question text for the first episode differs slightly from that of the questions regarding subsequent episodes (see Question 105, 107, and 110, as well as 106 and 108).

The first recorded cohabitation episode is the current episode. If such an episode exists (meaning, respondents mention living together with their current partner), only the date of the beginning of this period is asked, as the episode is ongoing. The variables sd8e1e_, consequently, do not exist. If a respondent does not live together with their current partner, but did so in the past, no first cohabitation episode (z=1) exists, but only cohabitation episodes of higher rank (z>1).

When did you and [name current partner (hpn)] start living together?

INFOBOX

Before the respondent is asked to consent to the partner survey, the partner is given a personal identification number (pid).

If partner exists and is the partner from previous wave (hpmt=0), the partner identification number from the previous wave is taken, i.e. pid=dpid.

If the respondent has a new partner and a partner number was not given to the previous partner (hpmt=1 & dpid=.), the personal identification number for the new partner is pid=id+101.

Example vignettes are show here in order to clearly illustrate the question format and presentation. No respondent was posed these exact vignettes.

Each respondent received three vignettes. Vignette variation was controlled externally, then transferred to the questionnaire.

The data from this vignette study will be made available as part of Release 12.0. A corresponding Technical Paper will include a more detailed description of the study, which will be made available here: www.pairfam.de/dokumentation/technical-papers/ .

Text 26

We are interested in how behaviors within romantic partnerships are evaluated. In the following, 3 example couples will be introduced. For all couples, both partners are approximately 30 years old. Thus far, each couple has remained faithful and do not lead open relationships.

Please indicate for each couple whether you would describe the behavior as infidelity, and how you would evaluate the behavior.

There are no right or wrong answers. We are simply interested in your personal opinion.

Questions 313 (crn1kx) to 318 (crn6kx_) are posed as a block first for the first child born since the previous interview, and then for each additional newborn.

The x in these variables corresponds to the child identification number. If the respondent, for example, already had two older children, and another child has been born since the previous wave, these questions are not posed for the first two children with the child identification number one (x=1) and two (x=2); these variables are coded -3 "does not apply". Questions 319 (crn37kx) to 333 (crn45kx_) are posed for each (relevant) child in blocks, i.e. all questions are posed first for the first child and then, in subsequent iterations, for each additional child.

The "x" in the variables refers to the child identification number. If the respondent has, for example, an older child and a child born in 2013, the questions are not posed for the older child with the child identification number of 1 (x=1) and each of the variables are coded with the value of -3 "does not apply". The questions are then posed for the younger child and the variables are coded with valid values.

INFOBOX

The following questions are posed for the youngest biological child whose other parent the anchor respondent no longer lives with, but has contact to.

In order to select the youngest child for whom this condition applies, a ranking according to birth year is generated, beginning with the most recent birth year. Only children under the age of 21 whose other biological parent the anchor respondent does not live with, but has contact to.

If two children have the same birth year, a random selection is made.

Formal condition: The auxiliary variable tkx is defined for all x with $(ehc9kx=1 \ \& \ ag8kx=1 \ \& \ ((\text{for at least one } y=1,\dots,5 \text{ with } ehc12kx=y \ \& \ crn22py=1,\dots,6) \mid crn23kx=1,\dots,6))$. The variable tkx represents the rank of each child according to descending birth year (ties solved randomly).

The child whose tkx value is 1 is selected ($tkx=1$).

INFOBOX

Definition of target children for the parenting survey

The selection of the children relevant for the parenting survey is defined as follows:

Child x is selected as a parenting survey child if one of the following conditions is met:

- Child x is a CAPI child
- Child x is a biological or adopted child, was born between 6 and 15 years before the start of fieldwork (and alive), lives exclusively outside the household, and is in contact with respondent
- Child x is 6-7 years old and lives with respondent in the same household

Formal condition: $\text{capikid}_x=1 \mid (\text{ehc9}_x=1,2 \ \& \ \text{ehc11}_x=0 \ \& \ \text{oij-ehc8}_{xy} \geq 6 \ \& \ \text{oij-ehc8}_{xy} \leq 15 \ \& \ \text{ehc10}_x > 8 \ \& \ \text{crn16}_x=1,\dots,6) \mid (\text{ag5}_x=1 \ \& \ \text{ehc11}_x=0 \ \& \ \text{ehc10}_x=1,\dots,8)$.

If child x (with $\text{cid}_x=1,\dots,15$) is selected as a parenting survey child, the variable pqk_x is set to 1.

The assignment of a parenting survey instrument to the respective children is clearly indicated by the identification number $\text{cid}_x=\text{id}+200+x$.
