Variable v10x WITH x=1	Variable v101

In the filter and question text:

Previous wave means: Reference to the wave of the previous year (if d0=1) or to the last wave that an interview took place (if no interview took place in the previous year, i.e. d0=0).

The dependent interviewing variables always contain the newest value, i.e. the value from W3 if d0=1, or the value from W2 if d0=0.

For filtering on sex we use the variable „sex“ (question 1). In the dataset this variable is saved as original__sex. For data analyse please use the generated variable sex__gen.

INFOBOX

The following section shows the progression of the external EHC. Note that it does not involve questions that are directly represented by variables. Rather, d-variables (input variables) are preloaded for each individual question. From the responses to the questions, ehc-variables (output variables) are made and shown in the EHC-output section.

First-time respondents (d0=2) are asked in the EHC about a specific time period. This time period is called "EHC time period" and spans the time period between January, 2010 and the date of the interview.

In the partnership and children modules, the number of persons is shortened as X.

[Not first-time respondents (d0≠2) and without partner in the previous wave (d7=2 & d507≠1): Please tell me now who you were together with since the last interview.]

In the last interview it was recorded that you had a partner [respondents who were married but separated from this partner in the previous wave (d507=1): [respondents with partner and married but separated from this partner (d7=1 & d507=1): and] were married] at the time of that interview. We would now like to know in which months you and your partner were having a relationship, if and when you were living together or were married. You see here a calendar with one column for every month between the last interview [First-time respondents (d0=2): EHC time period] and today. Also, your current partnership status is entered in the column labelled "now".

For each partner there are three lines, one for having a relationship, one for living together, and one for marriage or civil union.

We will proceed like this: You look at the screen and tell me what happened since the last interview [first-time respondents (d0=2): EHC time period], and I will enter the data. After we are finished, you can check that the information is correct.

Routing partnership modules

Whether questions regarding partnership are posed depends on the current status of the respondent. There is a module for singles, one with questions regarding the current partnership, one about meeting a new partner, and one about separation from the ex-partner. Routing Children Modules

INFOBOX

Definition of auxiliary variables that capture childrens' age groups:

Many questions within the children module are posed only if children of a particular age group are present. In order to increase the clarity of the filters, auxiliary variables corresponding to these age groups are defined in the following table.

Key:

1. Age groups are not disjointed.
2. Field start year = Year in which field work of current wave was started. The field phase of this wave extends from the fall/winter of the field start year through the winter/spring of the following field start year. This wave has the field start year 2014.

Group Label	Formal notation	Verbal definition	Formal definition
Children newly born after the previous wave	ag1kx=1	Child x was born after the previous wave (child who was indicated in the EHC of this wave but not in the previous wave, who is still living, and who was born no more than 1 year before the field start year (2 years for respondents who skipped a wave)), or first-time respondent's child	(d(28+x)≠1,2,-1 & ehc7kxg=1,2,-1 & ehc11kx=0) & ((d0=1 & oij-ehc8kxy<=1) (d0=0 & oji-ehc8kxy<=2))
Infants	ag2kx=1	Child x was born in the field start year or the year thereafter (and is still living)	ehc11kx=0 & oji-ehc8kxy=0,-1
Toddlers	ag3kx=1	Child x was born one or two years before the field start year (and is still living)	ehc11kx=0 & oji-ehc8kxy=1,2
Pre-school children	ag4kx=1	Child x was born three to five years before the field start year (and is still living)	ehc11kx=0 & oji-ehc8kxy=3,4,5
Children aged 6-7	ag5kx=1	Child x was born six to seven years before the field start year (and is still living)	ehc11kx=0 & oij-ehc8kxy=6,7
Children under 16	ag6kx=1	Child x was born fewer than 16 years before the field start year (and is still living)	ehc11kx=0 & oji-ehc8kxy<16
Children under 18 (minors)	ag7kx=1	Child x was born fewer than 18 years before the field start year (and is still living)	ehc11kx=0 & oji-ehc8kxy<18
Children under 21	ag8kx=1	Child x was born fewer than 21 years before the field start year (and is still living)	ehc11kx=0 & oji-ehc8kxy<21

Definition CAPI-Children

INFOBOX

If no children were eligible to be CAPI-children in the previous wave because there were no children between the ages of 8 and 15 in the household, but now there is such an eligible child, the youngest of these shall be interviewed as a CAPI-child. If there were children in the previous wave who were eligible for the CAPI survey, the attempt shall be made again to interview them. Additionally, children who are younger than the first (and thus oldest) child previously selected for the CAPI survey and who are now 8 years or older shall be interviewed.

In detail, the selection of the CAPI children is defined as follows:

Child x (with the child number $x=1,\dots,15$) of the respondent is selected as CAPI child if one of the following conditions is met:

- if in the previous waves no child of the respondent had been selected as CAPI child and
 - Child x is the youngest child living in the respondent's household who was born 8-15 years before the first year of field work. If this condition applies to more than one child (same year of birth), the child is selected from the group of all eligible children who was first mentioned by the respondent.
- if in the previous waves a child of the respondent had already been selected as a CAPI child and
 - Child x was a CAPI child in the previous wave, currently lives in the respondent's household and was born 8-15 years before the first year of field work, or
 - Child x was not a CAPI child in the previous wave, currently lives in the respondent's household, is younger than the first CAPI child and was born at least 8 years before the first year of field work.

Formal condition:

$((d420 \neq 0 \ \& \ d(421+x)=1 \ \& \ ehc11kx \neq 1 \ \& \ ehc10kx=1,\dots,8 \ \& \ 8 \leq oij-ehc8kxy \leq 15) \mid$
 $(d420 \neq 0 \ \& \ d(421+x) \neq 1 \ \& \ ehc11kx \neq 1 \ \& \ ehc10kx=1,\dots,8 \ \& \ (oij-d420) \geq oij-ehc8kxy \geq 8) \mid$
 $(d420=0 \ \& \ ehc11kx \neq 1 \ \& \ ehc10kx=1,\dots,8 \ \& \ 8 \leq oij-ehc8kxy \leq 15 \text{ (the youngest child, if more than one child fulfills this criteria (same year of birth), the first mentioned: } x < y \text{ for all } x=1,\dots,14 \text{ and } y=2,\dots,15 \text{ for } x=0,\dots,14)))$

If child x (with the child identification number $x=1,\dots,15$) is selected as CAPI-child, the variable $capikidx$ is set to 1.

INFOBOX

All children reported in the EHC are assigned a fixed person number: $cidx=id+200+x$.

INFOBOX

In question 31 (sd34i_) and question 32 (sd35i_) the x refers to the type of employment. This x corresponds to the last digit of the following EHC-variables: ehc19i12, ehc19i13, ehc19i14, ehc19i15, ehc19i16. Accordingly, x has five possible values (x=1,...,5), such that

1 = employed part time

2 = internship, trainee, etc.

3 = marginal part-time employment, mini-job, one-euro job when receiving unemployment benefits

4 = occasionally or irregularly employed

5 = other type of job.

The question 29 (sd34i_) and 30 (sd35i_) are asked together for each type of activity indicated by the respondent, starting with the first mentioned activity and then for each additional type of activity mentioned. If a type of activity was not mentioned by the respondent in the EHC, the corresponding variables take on the value of -3 "not applicable".

INFOBOX

For the routing of the following questions, occupation at the time of the previous interview and current occupation were used as filter variables. In order to make routing instructions easier to read, the auxiliary variables erw0, erw1, and erw2 were generated, defined as follows:

1. Respondent had an occupation at the time of the previous wave:

erw0=1 if

ehc19i3mx(x=month of interview previous wave)=1 | ehc19i10mx(x=month of interview previous wave)=1 |
ehc19i11mx(x=month of interview previous wave)=1 | ehc19i12mx(x=month of interview previous wave)=1 |
ehc19i13mx(x=month of interview previous wave)=1 | ehc19i14mx(x=month of interview previous wave)=1 |
ehc19i15mx(x=month of interview previous wave)=1 | ehc19i16mx(x=month of interview previous wave)=1
else erw0=0

2. Respondent has an occupation at the time of the current wave:

erw1=1 if

ehc19i10=1 | ehc19i11=1 | ehc19i12=1 | ehc19i13=1 | ehc19i14=1 | ehc19i15=1 | ehc19i16=1 | job22=2

else erw1=0

3. Respondent has several parallel occupations at the time of the current interview:

erw2=1 if

(ehc19i10+ehc19i11+ehc19i12+ehc19i13+ehc19i14+ehc19i15+ehc19i16+(job22=2)>1) | sd34i1=1 |
sd34i2=1 | sd34i3=1 | sd34i4=1 | sd34i5=1
else erw2=0

Attention erw2 is defined differently in the CAPI programming, but the result is identical:
(ehc19i10+ehc19i11+ehc19i12+ehc19i13+ehc19i14+ehc19i15+ehc19i16 >1)

or

(ehc19i10+ehc19i11+ehc19i12+ehc19i13+ehc19i14+ehc19i15+ehc19i16 = 1) and job22=2

or

sd34i1=1|sd34i2=1|sd34i3=1|sd34i4=1|sd34i5=1)

If the respondent has a new partner and a partner number was not given to the previous partner (hpmt=1 & dpid=.), the personal identification number for the new partner is pid=id+101.

Newborn module

INFOBOX

The questions 205 (crn1kx) to 210 (crn6kx_) are posed in their entirety first for the first newborn and then for each additional newborn.

The x in these variables corresponds to the child identification number. If the respondent, for example, already had two older children, and a new child has arrived since the previous wave, the questions are not posed for the first two children with the child identification number one (x=1) and two (x=2); these variables are articulated as -3 "does not apply". The questions are posed only for the newborn (x=3) and the variables have valid values only for this case.

Module for children up to 7 years

INFOBOX

The questions 211 (crn7kx) to 226 (crn45kx_) are posed for each (relevant) child in blocks, i.e. all questions are posed first for the first child and then, in subsequent iterations, for each additional child.

The “x” in the variables refers to the child identification number. If the respondent has, for example, an older child and a child born in 2010, the questions are not posed for the older child with the child identification number of 1 (x=1) and each of the variables are coded with the value of -3 “does not apply”. The questions are posed for the younger child and the variables are coded with valid values.

INFOBOX

The questions 230 (crn31kx) to 238 (crn15kx_) are posed for each (relevant) child in blocks, i.e. all questions are posed first for the first child and then, in subsequent iterations, for each additional child.

The x in these variables refers to the child number. An example for illustration: The respondent has for example no contact to the child with the child number 1 and all filter conditions apply to the second child, the questions are not posed for child number 1 ($x=1$) such that the variables take on the value -3 "Does not apply". The questions are posed to the child with the child number 2 ($x=2$) and the variables have valid values.

The questions 241 (crn53kxi1) through 259 (crn62kx) are posed en bloc for each child between the ages of 2 and 6, i. e. all questions are posed for the first child and then for the next child, and so on.

Question 241

Variable
crn53kxi1

for
x=1,...,15

[In first iteration]: The next questions concern the parental benefit. Just to jog your memory: : In early 2007, parental leave and associated benefits (Erziehungsurlaub and Erziehungsgeld) was replaced with a new legal framework for parental leave and parental benefit (Elternzeit and Elterngeld). Since then, an increasing number of fathers, too, receive parental leave and/or the parental benefit. We would like to know how it was for you. How was it with your child [name child x (ehc7kxn)]? Did you receive the parental benefit during the first 14 months of [name child x (ehc7kxn)]'s life?

Int.: In case of questions: Payment of the parental benefit is limited in principle to twelve months after the child's birth if only one parent applies for it. If the parents share parental leave, the benefit can be lengthened to a total of 14 months. The parental benefit is conceptualized as replacement for lost income, but unemployed persons can also receive the parental benefit.

In addition to the information we collected from you we are very interested in asking some questions of your child [name CAPI-child (ehc7kxn with capikidkx=1)] [if more than one CAPI-child designated (sum(capikidkx)>1 for x=1,...,15): your children [name all CAPI-children (ehc7kxn) with capikidkx=1]]. For this purpose we have developed a 15-minute oral survey that is specially suited to children.

Respondents with at least one child defined as CAPI-child (there is one x=1,...,15 with capikidkx=1)

INFOBOX

The following questions, Question 263 (ccs1kx) to Text 26 (v432x), are posed for each (relevant) child in blocks, i.e. all questions are posed first for the first child and then, in subsequent iterations, for each additional child.

Question 263Variable

Question 264Variable

Int.: Record the following information in the address protocol under "child":

First name of CAPI-child: [name]

Conduct child interview directly afterwards ☐ 1Appointment for child-CAPI arranged ☐ 2

Int.: Record the following information in the address protocol under "child":

Agreed upon appointment for call-back

First name of CAPI-child: [name]

ID of child (personal number CAPI-child): [cid]

Birth date of CAPI-child: [DD].[MM].[YYYY]

Respondents who have a child x defined as CAPI-child and who consented to the children's survey only conditionally (capikidkx=1 & ccs1kx=2)

Consent to parenting survey

Definition of children who belong to the target group of the parenting questionnaire.

INFOBOX

The selection of the children relevant for the parenting survey is defined as follows:

Child x is selected as a parenting-survey child if one of the following conditions is met:

- Child x is a CAPI-child
- Child x is a biological or adopted child, was born between 8 and 15 years before the start of fieldwork (and alive), lives exclusively outside the household, and is in contact with respondent
- Child x is 6 or 7 years old and lives with the respondent in the same HH.

Formal condition: $\text{capikidkx}=1 \mid (\text{ehc9kx}=1,2 \ \& \ \text{ehc11kx}=0 \ \& \ \text{ojj-ehc8kxy} \geq 8 \ \& \ \text{ojj-ehc8kxy} \leq 15 \ \& \ \text{ehc10kx} > 8 \ \& \ \text{crn16kx}=1,\dots,6) \mid (\text{ag5kx}=1 \ \& \ \text{ehc11kx}=0 \ \& \ \text{ehc10kx}=1,\dots,8).$

If child x (with child identification number $x=1,\dots,15$) is selected as a parenting-survey child, the variable pqkx is set to 1.

The assignment of a parenting survey instrument to the respective children is clearly indicated by the identification number $\text{cidx}=\text{id}+200+x$.

Question 265

Variable
 cpas1

We would like to ask you some additional questions about important aspects of the relationship between mother [male respondent ($\text{sex}=1$): father] and child. We want to reflect on your relationship to [Name pqkid (ehc7kxn with $\text{pqkx}=1$)] [if more than one pqkid ($\text{pqkx}=1$ for more than one $x=1,\dots,15$): your children [names all pqkid]] in this survey. For this purpose, we have developed a questionnaire that we would like for you to fill out. I'll leave the questionnaire [if more than one pqkid ($\text{pqkx}=1$ for more than one $x=1,\dots,15$): the questionnaires] here and you can fill it out after our interview. Is this ok?

Yes ☐ 1

No ☐ 2

Respondents who have at least one child who belongs to the target group of the parenting survey (at least one $x=1,\dots,15$ with $\text{pqkx}=1$).

Question 266

Variable

Parenting survey number: [cidx]

First name pqkid: [ehc7kxn with pqkx=1]

Respondents who consented to the children's and parenting survey for at least one child (cpas1=1)

INFOBOX

The selection of children for the parenting survey for partners is defined as follows:

Partners will be selected to answer the parenting survey regarding child x if the following criteria are fulfilled:

- Child x is a CAPI-child or 6 or 7 years old and lives with the respondent in the same HH.
- Respondent and partner live in the same HH.

Formal condition: $hpc=1 \ \& \ (capikidx=1 \mid (ag5kx=1 \ \& \ ehc11kx=0 \ \& \ ehc10kx=1, \dots, 8))$.

When a partner is selected to answer the parenting survey regarding child x (with child number $x=1, \dots, 15$), the variable $pqpkx$ will be coded 1.

The assignment of a parenting survey instrument to the respective children is clearly indicated by the identification number $cidx=id+200+x$.
