# Demography - Event History Calendar (EHC)

## INFOBOX

The following section shows the progression of the external EHC. Note that it does not involve questions that are directly represented by variables. Rather, d-variables (input variables) are preloaded for each individual question. From the responses to the questions, EHC variables (output variables) are made and shown in the EHC output section.

First-time respondents (d0=2) are asked in the EHC about a specific time period. This time period is called „EHC time period“ and spans the period between January of the field period of the previous wave and the date of the current interview.

In the partnership and children modules, the number of persons is shortened to X.

Partnership module: X=1,...,5

Children module: X=1,...,15

## Partnership

We would now like to know in which months you and your partner were having a relationship, if and when you were living together, or were married. You can see here a calendar with one column for each month between the last interview [First-time respondents (d0=2): EHC time period] and today. Also, your current partnership status is entered in the column labelled "now".

For each partner there are three lines, one for having a relationship, one for living together, and one for marriage or civil union.

We will proceed as follows: You will look at the screen and tell me what has happened since the last interview [first-time respondents (d0=2): EHC time period], and I will enter the data. After we are finished, you can check if the information I have entered is correct.

Figure: Example of a partner calendar in the EHC

The screenshot shows the EHC partner calendar interface. It features a grid for three partners: Marion (Weiblich), Stefanie (Weiblich), and Lisa (Weiblich). Each partner has three rows for 'Beziehung' (Relationship), 'Wohnen' (Living together), and 'Ehe' (Marriage). The columns represent months from January to October, plus 'Jetzt' (Now). Marion's 'Beziehung' row has a green box with '01.2011'. Marion's 'Wohnen' row has a blue box with '01.2011'. Marion's 'Ehe' row has a yellow box with '01.2011'. Stefanie and Lisa have empty rows. At the bottom, there is a question 'In welchen Monaten waren Sie mit Marion zusammen?' and a 'Zurück' button.

*Pop-Up 46: Respondents who want to delete a preload: "Do you really want to delete this entry?" (Yes/No) → "Yes": proceed with A2 and preload is deleted; "No": proceed with A2 (no changes)*

Pop-Up 47: Respondents who did not enter any months in which they were undertaking an occupation: "You entered that since [date of interview previous wave (d5,d6); first-time respondents (d0=2): EHC time period] you undertook [occupation type (from A1)]. You did not indicate the months in which that was the case. Did you engage in this occupation?" (Yes/No) -> "Yes": proceed with A2; "No": proceed with A2 and occupation is deleted

Pop-Up 48: Respondents who did not enter an occupation for a given month: "Please correct your data. Gaps are highlighted as red bars." (OK)

Pop-Up 49: Respondents who indicated two activities for the same month (only for certain combinations, cf. check for sdp10): "There is an overlap (red bar) in the months [list of month names in which there is an overlap] for [type of activity X (from A1)] and [type of activity Y]. Do you want to correct this entry?" (Yes/No) -> proceed with A2

Pop-Up 50: Respondents who indicated an activity and "Don't know/Can't remember": "There is an overlap (red bar) in the months [list of month names in which there is an overlap] for [type of activity X (from A1)] and "Don't know/Can't remember." Do you want to correct this entry?" (Yes/No) -> proceed with A2

Pop-Up 52: Respondents who indicated an activity for "now" but not for the month of the interview: You indicated that you are currently involved in [type of activity X (from A1)]. But you did not indicate that you are involved in this activity this month. Please think about when you started the activity and correct your answer" (OK)

Pop-Up 53: Respondents who did not indicate a month for an activity that was indicated in the previous wave at the time of interview: „In the last interview you indicated that you were engaged in [type of activity] on [date of interview previous wave (d5, d6)]. Are you sure that you no longer have been engaged in this activity since [date of interview previous wave]?" [Yes, delete activity][No, activity was engaged in on [date of interview previous wave]

Pop-Up 54: Respondents who indicated simultaneously „full-time employment“ and „self-employment“ such that the 2 episodes overlap completely: „You indicated that you are (if not „now“: were) employed full-time and self-employed. If you pursue (if not „now“: pursued) your self-employment on a full-time basis but are (were) not employed in another job elsewhere, only the activity „self-employment“ should be marked. Are (if not „now2: Were) you really engaged in both activities? Yes = you are employed full-time and additionally self-employed. No = You are self-employed only (Full-time employment will be deleted).“ [Yes]-> continue with A2; [No]-> continue with A2 and the line „full-time employment“ is deleted

## Routing of partnership modules

Whether questions regarding partnership are posed depends on the current status of the respondent. There is a module for singles, one with questions regarding the current partnership, one about meeting a new partner, and one about separation from the ex-partner. The following overview shows which modules are included in each interview.

Preload from Previous Wave	EHC Entry Interview Month of Previous Wave	EHC Entry Interview Month	Separation	Module

## Routing of children modules

### INFOBOX

#### Definition of auxiliary variables that capture children's age groups:

Many questions within the children module are posed only if children of a particular age group are present. In order to increase the clarity of the filters, auxiliary variables corresponding to these age groups are defined in the following table.

Key:

1. Age groups are not disjointed.

## Definition of CAPI children

### INFOBOX

If no children were eligible to be CAPI children in the previous wave because there were no children between the ages of 8 and 15 in the household, but now there is such an eligible child, the youngest of these shall be interviewed as a CAPI child. If there were children in the previous wave who were eligible for the CAPI survey, the attempt shall be made again to interview them. Additionally, children who are younger than the first (and thus oldest) child previously selected for the CAPI survey and who are now 8 years or older shall be interviewed.

In detail, the selection of the CAPI children is defined as follows:

Child  $x$  (with the child number  $x=1,\dots,15$ ) of the respondent is selected as CAPI child if one of the following conditions is met:

- if in the previous waves no child of the respondent had been selected as CAPI child and
  - Child  $x$  is the youngest child living in the respondent's household who was born 8-15 years before the first year of field work. If this condition applies to more than one child (same year of birth), the child is selected from the group of all eligible children who was first mentioned by the respondent.
- if in the previous waves a child of the respondent had already been selected as a CAPI child and
  - Child  $x$  was a CAPI child in the previous wave, currently lives in the respondent's household and was born 8-15 years before the first year of field work, or
  - Child  $x$  was not a CAPI child in the previous wave, currently lives in the respondent's household, is younger than the first CAPI child and was born at least 8 years before the first year of field work.

Formal condition:

$((d420 \neq 0 \ \& \ d(421+x)=1 \ \& \ ehc11kx \neq 1 \ \& \ ehc10kx=1,\dots,8 \ \& \ 8 \leq oij-ehc8kxy \leq 15) \mid$   
 $(d420 \neq 0 \ \& \ d(421+x) \neq 1 \ \& \ ehc11kx \neq 1 \ \& \ ehc10kx=1,\dots,8 \ \& \ (oij-d420) \geq oij-ehc8kxy \geq 8) \mid$   
 $(d420=0 \ \& \ ehc11kx \neq 1 \ \& \ ehc10kx=1,\dots,8 \ \& \ 8 \leq oij-ehc8kxy \leq 15$  (the youngest child, if more than one child fulfills this criteria (same year of birth), the first mentioned:  $x < y$  for all  $x=1,\dots,14$  and  $y=2,\dots,15$ ) for  $x=0,\dots,14$ ))

If child  $x$  (with the child identification number  $x=1,\dots,15$ ) is selected as CAPI child, the variable  $capi-kidkx$  is set to 1.

The identification number  $cidx=id+200+x$  for  $capi-kidkx=1$  allows for an explicit assignment of the data from the children's survey.

### INFOBOX

In question 35 (sd34i\_) and question 36 (sd35i\_) the x refers to the type of employment. This x corresponds to the last digit of the following EHC-variables: ehc19i12, ehc19i13, ehc19i14, ehc19i15, ehc19i16. Accordingly, x has five possible values (x=1,...,5), such that

1 = employed part time

2 = internship, trainee, etc.

3 = marginal part-time employment, mini-job, "Ein-Euro-Job"

4 = occasionally or irregularly employed

5 = other type of job.

Questions 35 (sd34i\_) and 36 (sd35i\_) are asked together for each type of activity indicated by the respondent, starting with the first mentioned activity and then for each additional type of activity mentioned. If a type of activity was not mentioned by the respondent in the EHC, the corresponding variables take on the value of -3 "not applicable".

## INFOBOX

For the routing of the following questions, occupation at the time of the previous interview and current occupation were used as filter variables. In order to make routing instructions easier to read, the auxiliary variables erw0, erw1, and erw2 have been generated, and are defined as follows:

1. Respondent was employed at the time of the previous wave:

erw0=1 if

ehc19i3mx(x=date of interview previous wave)=1 | ehc19i10mx(x=date of interview previous wave)=1 |  
ehc19i11mx(x=date of interview previous wave)=1 | ehc19i12mx(x=date of interview previous wave)=1 |  
ehc19i13mx(x=date of interview previous wave)=1 | ehc19i14mx(x=date of interview previous wave)=1 |  
ehc19i15mx(x=date of interview previous wave)=1 | ehc19i16mx(x=date of interview previous wave)=1  
else erw0=0

2. Respondent is employed at the time of the current wave:

erw1=1 if

ehc19i10=1 | ehc19i11=1 | ehc19i12=1 | ehc19i13=1 | ehc19i14=1 | ehc19i15=1 | ehc19i16=1 | job22=2  
else erw1=0

3. Respondent is employed at several parallel jobs at the time of the current interview:

erw2=1 if

(ehc19i10+ehc19i11+ehc19i12+ehc19i13+ehc19i14+ehc19i15+ehc19i16+(job22=2)>1) |  
sd34i1=1 | sd34i2=1 | sd34i3=1 | sd34i4=1 | sd34i5=1  
else erw2=0

Note: erw2 is defined differently in the CAPI programming, but the result is identical:  
(ehc19i10+ehc19i11+ehc19i12+ehc19i13+ehc19i14+ehc19i15+ehc19i16 >1) or  
(ehc19i10+ehc19i11+ehc19i12+ehc19i13+ehc19i14+ehc19i15+ehc19i16 = 1) and job22=2 or  
sd34i1=1|sd34i2=1|sd34i3=1|sd34i4=1|sd34i5=1)

## Consent to partner survey

### INFOBOX

Before the respondent is asked to consent to the partner survey, the partner is given a personal identification number (pid).

If partner exists and is the partner from previous wave (hpmt=0), the partner identification number from the previous wave is taken, i.e. pid=dpid.

If the respondent has a new partner and a partner number was already given to the previous partner (hpmt=1 & dpid≠.), the personal identification number for the new partner is pid=dpid+1.

If the respondent has a new partner and a partner number was not given to the previous partner (hpmt=1 & dpid=.), the personal identification number for the new partner is pid=id+101.

Respondents whose child x moved out in the previous wave ((d1(18+x)=1 & ehc10kx=9 & ehc11kx=0) for x=1,...,15)

**Question  
225**

Variable  
crn92

**I would now like to know how feel about the fact that [name child x (ehc7kxn) who moved out (d1(18+x)=1 & ehc10kx=9 & ehc11kx=0)] no longer lives with you** [if more than one x=1,...,15 with (d1(18+x)=1 & ehc10kx=9 & ehc11kx=0): your children (names of all children (ehc7kxn) who moved out) no longer live with you].

**I will not read aloud any answer choices. I would like you to simply explain what is important to you in this context. I would like to record our response so that I don't need to take detailed notes. The recording will be used exclusively as a tool for our analysis, and will be kept confidential until it is deleted after its transcription.**

**Do you consent to the recording of your response?**

*Int.: If respondent expresses doubts regarding data protection: You can be sure that no unauthorized persons will be given access to the recording. It will simply be transcribed and anonymized, if necessary, before being deleted.*

*Int.: If respondent asks how much time is available: The program allows for a maximum of 3 minutes.*

*If respondent asks again what the question is about or what he/she should say (e.g., "What should I say about that?" or "What do you mean exactly?"), the introduction is to be repeated in similar words: We would like to find out how respondents cope with their chil(ren) moving out of the parental home, meaning: how you are managing it and/or how you feel about it.*

## Newborn module

### INFOBOX

The questions 205 (crn1kx) to 210 (crn6kx) are posed in their entirety first for the first child born since the previous interview, and then for each additional newborn.

The x in these variables corresponds to the child identification number. If the respondent, for example, already had two older children, and a new child has arrived since the previous wave, the questions are not posed for the first two children with the child identification number one (x=1) and two (x=2); these variables are articulated as -3 "does not apply". The following questions are posed only for the newborn child (x=3) and the variables have valid values only for this case.

#### Question 227

Variable

## Children up to 7 years

**INFOBOX**

The questions 233 (crn7kx) to 247 (crn45kx\_) are posed for each (relevant) child in blocks, i.e. all questions are posed first for the first child and then, in subsequent iterations, for each additional child.

The "x" in the variables refers to the child identification number. If the respondent has, for example, an older child and a child born in 2013, the questions are not posed for the older child with the child identification number of 1 (x=1) and each of the variables are coded with the value of -3 "does not apply". The questions are posed for the younger child and the variables are coded with valid values.

## Parental benefits

INFOBOX

The questions 241 (crn53kxi1) to 259 (crn62kx) are posed for each (relevant) child in blocks, i.e. all questions are posed first for the first child and then, in subsequent iterations, for each additional child.

Question  
266

Variable  
crn53kxi1

```
for
x=1.....15
```

[First iteration]: The next questions cover the topic of parental benefits (Elterngeld). We would like to know how it was for you. How was it with your child [name child x (ehc7kxn)]? Did you receive parental benefits during the first 14 months of [name child x (ehc7kxn)]'s life?

*Int.: In case of questions: Payment of parental benefits (Elterngeld) is limited, in principle, to 12 months after the child's birth if only one parent applies for it. If both parents share parental leave (Elternzeit), the benefits can be extended to a total of 14 months. The parental benefit subsidy is conceptualized as replacement for lost income; however, unemployed parents may also receive it.*

### Definition of target children for the parenting survey

#### INFOBOX

The selection of the children relevant for the parenting survey is defined as follows:

Child x is selected as a parenting survey child if one of the following conditions is met:

- Child x is a CAPI child
- Child x is a biological or adopted child, was born between 8 and 15 years before the start of fieldwork (and alive), lives exclusively outside the household, and is in contact with respondent
- Child x is 6/7 years old and lives with respondent in the same household

Formal condition:  $\text{capikidkx}=1 \mid (\text{ehc9kx}=1,2 \ \& \ \text{ehc11kx}=0 \ \& \ \text{oj-ehc8kxy} \geq 8 \ \& \ \text{oj-ehc8kxy} \leq 15 \ \& \ \text{ehc10kx} > 8 \ \& \ \text{crn16kx}=1,\dots,6) \mid (\text{ag5kx}=1 \ \& \ \text{ehc11kx}=0 \ \& \ \text{ehc10kx}=1,\dots,8).$

If child x (with child identification number  $x=1,\dots,15$ ) is selected as a parenting survey child, the variable  $\text{pqkx}$  is set to 1.

The assignment of a parenting survey instrument to the respective children is clearly indicated by the identification number  $\text{cidx}=\text{id}+200+x$ .

## INFOBOX

In order to improve the legibility of the filters and question texts, the following auxiliary variables were defined:

d406	adoptive parents relevant	directly from the preloads
lmhh1	biol. mother in household at main residence (HH1) (1=yes, 0=no)	there is one x=1,...,20 with ehc23px=2 & ehc25px=1
lvhh1	biol. father in HH1 (1=yes, 0=no)	there is one x=1,...,20 with ehc23px=3 & ehc25px=1
amhh1	adoptive mother in HH1 (1=yes, 0=no)	there is one x=1,...,20 with ehc23px=4 & ehc25px=1
avhh1	adoptive father in HH1 (1=yes, 0=no)	there is one x=1,...,20 with ehc23px=5 & ehc25px=1
smhh1	stepmother in HH1 (1=yes, 0=no)	there is one x=1,...,20 with ehc23px=6 & ehc25px=1
svhh1	stepfather in HH1 (1=yes, 0=no)	there is one x=1,...,20 with ehc23px=7 & ehc25px=1

The following variables are subject to the conditions noted in column 4. In addition to the categories indicated, there is a "missing" category. Cases that cannot be assigned to any other category using the (previously) defined conditions are placed in the "missing" category. If new information useful for categorization arises out of the answers to the following questions, the auxiliary variables will be re-coded in each case. An overview of how the variables are set upon the end of the survey is included at the end of the module.
