Preface

Interview mode for wave 12

Due to challenges caused by the COVID-19 pandemic and lockdown measures in Germany, CAPI interview fieldwork was interrupted in March 2020 and recommenced with CATI interviews in April 2020. The questions posed in the standard CASI section of the interview were transferred to a PAPI questionnaire sent to respondents' home address following the telephone interview.

Interview mode is documented in the new variable *intmode* with the following values:

- 1: CAPI with CASI section
- 2: CATI with completed PAPI
- 3: CATI (PAPI missing)

Codebook identifiers

Official year of interview oij=2019

Respondent groups

Three groups of respondents are posed further questions beyond the standard question program:

Former CAPI children are the children of other anchor respondents who previously participated in the children's CAPI survey and are now interviewed every year as anchor respondents themselves.

First-time respondents are former CAPI children who are participating in the current wave for the first time as anchor respondents, designated by the preload variable d0=2.

Refreshment sample respondents belong to the group of respondents part of a new sampling who were interviewed for the first time in Wave 11 of the pairfam panel. They can be identified by household number (hhid≥930000).

Notation key

Notation in filter	Meaning
&	AND
	OR
x=1,2	x=1 OR x=2
x≠1,2	x≠1 AND x≠2
x=1,...,3	x=1 OR x=2 OR x=3
Variable v10x with x=1	Variable v101

In the filter and question text:

Previous wave: Reference to the wave of the previous year (if d0=1) or to the last wave that an interview took place if no interview took place in the previous year (i.e., d0=0).

Variables for dependent interviewing always contain the most recent value (i.e., the value from the previous year, if d0=1) or the value from the last wave that an interview took place (if d0=0).

Variables for dependent interviewing

The following variable list was generated based on variables from the previous wave and contains information necessary for dependent interviewing. This section serves the sole purpose of documenting the preparation of the interview (either the identification of the anchor or the reporting of a missed interview). The questions or instructions are addressed to the interviewer, who responds alone without the involvement of the respondent. No variables corresponding to these questions are in the data set.

Demography - Event History Calendar (EHC)

INFOBOX

The following section shows the progression of the external EHC. Note that it does not involve questions that are directly represented by variables. Rather, d-variables (input variables) are preloaded for each individual question. From the responses to the questions, EHC variables (output variables) are made and shown in the EHC output section.

First-time respondents (d0=2) are asked in the EHC about a specific time period. This time period is called the "EHC time period" and spans the period between January of the field period of the previous wave and the date of the current interview.

In the partnership and children modules, the number of persons is shortened to X.

Partnership module: X=1,...,5

Children module: X=1,...,15

EHC 1

P1

[First-time respondents (d0=2): We would like to know how your life has progressed since [EHC time period] in the areas of partnership, children, residence, work, and career. This first section is about intimate relationships.]

You may remember that in [date of interview previous wave (d5, d6)] we talked about events in your life after the first interview in the domains of partnership, children, residence, job, and career. Again, we would like to know what has happened in your life since the last interview.

This first section is about intimate relationships.

Int.: For respondents interviewed for the first time: Due to technical reasons, only the time since [EHC time period] can be recorded here.

Navigation: "Continue": if no partner or marriage in the previous wave (d7≠1 & d507≠1), then proceed with P2, otherwise proceed with P3.

Do you currently have a partner? Or did you have a partner some time after [date of interview previous wave (d5, d6); first-time respondents (d0=2): EHC time period]?

[First-time respondents (d0=2): Please tell me with whom you have been together since [EHC time period].]

[Not first-time respondents (d0≠2) and without partner in the previous wave (d7=2 & d507≠1): Please tell me with whom you have been together since the last interview.]

In the last interview it was recorded that you had a partner [respondents who were married but separated from this partner in the previous wave (d507=1): [respondents with a partner and married but separated from this partner in the previous wave (d7=1 & d507=1): and] were married] at the time of that interview. **He** [partner from previous wave female (d9=2): She][married but separated: This] **is listed here already. First, I would like to ask if you also had other relationships after** [date of interview previous wave (d5, d6)].

Int.: Date of birth can be changed only for partners from the previous wave. For new partners, no date of birth can be entered.

If respondent does not indicate month and year: "Please try to indicate the date as precisely as possible. If you don't remember exactly, please try to tell me at least the season and year, or only the year."

If the anchor can only remember the season, please enter the following numbers in the field "month":

Navigation: "Go back": proceed with P1; "Data complete, continue": at first instance, continue with P4, otherwise continue with P5, if no response was made in P3, continue with P2

Respondents who had a partner in the previous wave or in the time between the previous and current waves or who were married in the previous wave (d7=1 | P2="Yes" | d507=1)

Note: At this question a table with several rows appears in which up to five partners (name and sex of partner) the respondent was/is with between the previous and current waves can be entered. If a partner had been named in the previous wave, this person's name (d8), sex (d9), and date of birth (d397, d398, d317) are shown in the first row. If the sex is not indicated (d9≠1,2), no sex will be shown. If no date of birth was indicated (d397, d398, d317=0), "0" is shown.

Pop-Up 1: Respondents who indicated an invalid date of birth in P3 for the partner from the previous wave: "Please enter a valid value for the day [if month invalid: 'month'; if year invalid: 'year'] of birth." (OK)

Pop-Up 2: Respondents who changed name, sex, or date of birth of a partner from the previous wave in P3: "You made changes in the data on your partner from the last survey. Is this really the partner from the last survey?" (Yes/No) -> "Yes" + "Continue": proceed with P3 and changes will be saved; "No" + "Continue": proceed with P3, no changes

Pop-Up 3: Respondents who failed to enter a name for a partner in P3: "Please enter a name for partner [partner number]." (OK)

Pop-Up 4: Respondents who failed to enter a sex for a partner in P3: "Please enter the sex of [name current partner (hpn)]." (OK)

EHC 4

P4

We would now like to know in which months you and your partner were having a relationship, if and when you were living together, or were married. You can see here a calendar with one column for each month between the last interview [First-time respondents (d0=2): EHC time period] and today. Also, your current partnership status is entered in the column labeled "now".

For each partner there are three lines, one for having a relationship, one for living together, and one for marriage or civil union.

We will proceed as follows: You will look at the screen and tell me what has happened since the last interview [first-time respondents (d0=2): EHC time period], and I will enter the data. After we are finished, you can check if the information I have entered is correct.

Navigation: "Go back": proceed with P3; "Continue": proceed with P5

Respondents who had a partner in the previous wave or in the time between the previous and current wave, or who were married in the previous wave (d7=1 | P2="Yes" | d507=1)

Note: The screen P4 (pd3) is shown only once during the EHC procedure. It is not possible to return to this question/screen a second time.

EHC 5

In which months were you together with [name of partner X (from P3)]?

P5

In which months did you and [name of partner X] live together?

In which months were you and [name of partner X] married [same-sex partner (from P3): married or in a civil union]?

If, however, "Add child" was clicked on the K1 screen, all information for the child must be entered for the first time on this screen. For newly added children, the question of the identity of the other parent is not posed in this input mask. This information is requested separately for each newly added child in K5.

Routing of partnership modules

Whether questions regarding partnership are posed depends on the current status of the respondent. There is a module for singles, one with questions regarding the current partnership, one about meeting a new partner, and one about separation from the ex-partner. The following overview shows which modules are included in each interview.

Preload from previous wave	EHC entry interview month of previous wave	EHC entry interview month	Separation	Module

Routing of children modules

Definition of auxiliary variables that capture children's age groups:

Many questions within the children module are posed only if children of a particular age group are present. In order to increase the clarity of the filters, auxiliary variables corresponding to these age groups are defined in the following table.

Key:

1. Age groups are not disjointed.
2. Field start year = Year in which field work of current wave was started. The field phase of this wave extends from the fall/winter of the field start year through the winter/spring of the following field start year.

Group label	Formal notation	Verbal definition	Formal definition
Children newly born after the previous wave	ag1kx=1	Child x was born after the previous wave (child who was indicated in the EHC of this wave but not in the previous wave, who is still living, and who was born no more than 1 year before the field start year (2 years for respondents who skipped a wave), or first-time respondent's child)	$(d(28+x) \neq 1,2,-1 \text{ \& } ehc7kxg=1,2,-1 \text{ \& } ehc11kx=0) \text{ \& } ((d0=1 \text{ \& } oij-ehc8kxy \leq 1) \mid (d0=0 \text{ \& } oij-ehc8kxy \leq 2) \mid d0=2)$
Infants	ag2kx=1	Child x was born in the field start year or the year thereafter (and is still living)	$ehc11kx=0 \text{ \& } oji-ehc8kxy=0,-1$
Toddlers	ag3kx=1	Child x was born one or two years before the field start year (and is still living)	$ehc11kx=0 \text{ \& } oji-ehc8kxy=1,2$
Pre-school children	ag4kx=1	Child x was born three to five years before the field start year (and is still living)	$ehc11kx=0 \text{ \& } oji-ehc8kxy=3,4,5$
Children aged 6-7	ag5kx=1	Child x was born six to seven years before the field start year (and is still living)	$ehc11kx=0 \text{ \& } oij-ehc8kxy=6,7$
Children under 16	ag6kx=1	Child x was born fewer than 16 years before the field start year (and is still living)	$ehc11kx=0 \text{ \& } oji-ehc8kxy < 16$
Children under 18 (minors)	ag7kx=1	Child x was born fewer than 18 years before the field start year (and is still living)	$ehc11kx=0 \text{ \& } oji-ehc8kxy < 18$
Children under 21	ag8kx=1	Child x was born fewer than 21 years before the field start year (and is still living)	$ehc11kx=0 \text{ \& } oji-ehc8kxy < 21$

Definition of CAPI children

INFOBOX

If no children were eligible to be CAPI children in the previous wave because there were no children between the ages of 8 and 15 in the household, but now there is such an eligible child (or children), the youngest of these shall be interviewed as a CAPI child. If there were children in the previous wave who were eligible for the CAPI survey, the attempt shall be made again to interview them. Additionally, children who are younger than the first (and thus oldest) child previously selected for the CAPI survey and who are now 8 years or older shall be interviewed.

In detail, the selection of the CAPI children is defined as follows:

Child x (with the child number $x=1,\dots,15$) of the respondent is selected as CAPI child if one of the following conditions is met:

- if in the previous waves no child of the respondent had been selected as CAPI child and
 - Child x is the youngest child living in the respondent's household who was born 8-15 years before the first year of field work. If this condition applies to more than one child (same year of birth), the child is selected from the group of all eligible children who was first mentioned by the respondent.
- if in the previous waves a child of the respondent had already been selected as a CAPI child and
 - Child x was a CAPI child in the previous wave, currently lives in the respondent's household and was born 8-15 years before the first year of field work, or
 - Child x was not a CAPI child in the previous wave, currently lives in the respondent's household, is younger than the first CAPI child and was born at least 8 years before the first year of field work.

Formal condition:

$((d420 \neq 0 \ \& \ d(421+x)=1 \ \& \ ehc11kx \neq 1 \ \& \ ehc10kx=1,\dots,8 \ \& \ 8 \leq oij-ehc8kxy \leq 15) \mid$
 $(d420 \neq 0 \ \& \ d(421+x) \neq 1 \ \& \ ehc11kx \neq 1 \ \& \ ehc10kx=1,\dots,8 \ \& \ (oij-d420) > oij-ehc8kxy \geq 8) \mid$
 $(d420=0 \ \& \ ehc11kx \neq 1 \ \& \ ehc10kx=1,\dots,8 \ \& \ 8 \leq oij-ehc8kxy \leq 15)$ (the youngest child, if more than one child fulfills this criteria (same year of birth), the first mentioned: $x < y$ for all $x=1,\dots,14$ and $y=2,\dots,15$) for $x=0,\dots,14$))

If child x (with the child identification number $x=1,\dots,15$) is selected as CAPI child, the variable $capi-kidkx$ is set to 1.

All children mentioned in the EHC receive the following unchanging identification number: $cidx=id+200+x$.

Auxiliary variables for intergenerational relationships

In order to improve the legibility of the filters and question texts, the following auxiliary variables were defined:

d406	adoptive parents relevant	directly from the preloads
lmhh1	biol. mother in household at main residence (HH1) (1=yes, 0=no)	there is one x=1,...,20 with ehc23px=2 & ehc25px=1
lvhh1	biol. father in HH1 (1=yes, 0=no)	there is one x=1,...,20 with ehc23px=3 & ehc25px=1
amhh1	adoptive mother in HH1 (1=yes, 0=no)	there is one x=1,...,20 with ehc23px=4 & ehc25px=1
avhh1	adoptive father in HH1 (1=yes, 0=no)	there is one x=1,...,20 with ehc23px=5 & ehc25px=1
smhh1	stepmother in HH1 (1=yes, 0=no)	there is one x=1,...,20 with ehc23px=6 & ehc25px=1
svhh1	stepfather in HH1 (1=yes, 0=no)	there is one x=1,...,20 with ehc23px=7 & ehc25px=1

The following variables are subject to the conditions noted in column 4. In addition to the categories indicated, there is a "missing" category. Cases that cannot be assigned to any other category using the (previously) defined conditions are placed in the "missing" category. If new information useful for categorization arises out of the answers to the following questions, the auxiliary variables will be re-coded in each case. An overview of how the variables are set upon the end of the survey is included at the end of the module.

INFOBOX

In Question 27 (sd34i_) and Question 28 (sd35i_) the x refers to the type of employment. This x corresponds to the last digit of the following EHC-variables: ehc19i12, ehc19i13, ehc19i14, ehc19i15, ehc19i16. Accordingly, x has five possible values (x=1,...,5):

1 = employed part time

2 = internship, trainee, etc.

3 = marginal part-time employment, mini-job, "one-euro job"

4 = occasionally or irregularly employed

5 = other type of job.

Questions 27 (sd34i_) and 28 (sd35i_) are asked together for each type of activity indicated by the respondent, starting with the first mentioned activity and then for each additional type of activity mentioned. If a type of activity was not mentioned by the respondent in the EHC, the corresponding variables take on the value of -3 "not applicable".

INFOBOX

For the routing of the following questions, occupation at the time of the previous interview and current occupation were used as filter variables. In order to make routing instructions easier to read, the auxiliary variables erw0, erw1, and erw2 have been generated, and are defined as follows:

1. Respondent was employed at the time of the previous wave:

erw0=1 if

ehc19i3mx(x=date of interview previous wave)=1 | ehc19i10mx(x=date of interview previous wave)=1 |
ehc19i11mx(x=date of interview previous wave)=1 | ehc19i12mx(x=date of interview previous wave)=1 |
ehc19i13mx(x=date of interview previous wave)=1 | ehc19i14mx(x=date of interview previous wave)=1 |
ehc19i15mx(x=date of interview previous wave)=1 | ehc19i16mx(x=date of interview previous wave)=1
else erw0=0

2. Respondent is employed at the time of the current wave:

erw1=1 if

(ehc19i10=1 | ehc19i11=1 | ehc19i12=1 | ehc19i13=1 | ehc19i14=1 | ehc19i15=1 | ehc19i16=1 | job22=2)
else erw1=0

3. Respondent is employed at several parallel jobs at the time of the current interview:

erw2=1 if

(ehc19i10+ehc19i11+ehc19i12+ehc19i13+ehc19i14+ehc19i15+ehc19i16+(job22=2)>1) |
(sd34i1=1 | sd34i2=1 | sd34i3=1 | sd34i4=1 | sd34i5=1)
else erw2=0

Note: erw2 is defined differently in the CAPI programming, but the result is identical:
(ehc19i10+ehc19i11+ehc19i12+ehc19i13+ehc19i14+ehc19i15+ehc19i16 >1) or
(ehc19i10+ehc19i11+ehc19i12+ehc19i13+ehc19i14+ehc19i15+ehc19i16 = 1) and job22=2 or

If the respondent has a new partner and a partner number was already given to the previous partner (hpmt=1 & dpid≠.), the personal identification number for the new partner is pid=dpid+1.

If the respondent has a new partner and a partner number was not given to the previous partner (hpmt=1 & dpid=.), the personal identification number for the new partner is pid=id+101.

Vignette study: Child care and employment (CASI)

INFOBOX

Example vignettes are shown here in order to clearly illustrate the question format and presentation.

Each respondent received three vignettes. Vignette variation was controlled externally, then transferred to the questionnaire.

Question order within the vignettes varied within the CAPI format, so that half of the respondents were asked first about the male character's employment, while the other half were asked first about the female character's employment.

A randomly-selected group of respondents (50 % of the sample) also received an additional introductory text explaining the effects of gainful employment on mothers' financial situations (information treatment). Respondents from this treatment group are identified with `vigtr=1`.

Technical Paper No. 19 (Schober et al. 2022) includes a more detailed description of the study: <https://doi.org/10.5282/ubm/epub.92001>

Text 22

We are interested in how you evaluate the compatibility of gainful employment and child care for couples with a young child.

[Treatment group respondents (`vigtr=1`): As of 2013, each child over the age of 2 is entitled to a place at a daycare facility, allowing for both parents - if they so choose - to pursue gainful employment. Particularly for mothers, earned income of one's own can improve their financial situation in the long term. Scientific research shows that for mothers, shorter absence periods from employment result in higher salaries in the long term, reducing the risk of old-age poverty.]

In the following, three example couples with their first child (15 months) will be introduced.

For all couples, both parents are approximately 30 years old, similarly educated, and have permanent employment contracts. Both parents have a job which can only be worked during the day, does not require them to travel or commute, and both worked full time before the birth of their child.

The child can be cared for by the parents or in a daycare facility (daycare, crèche, or nanny), other options (e.g., grandparents or au pair) are not available.

Please indicate for each couple how much each parent should work and how long the child should be cared for by the daycare facility.

There are no right or wrong answers. We are simply interested in your personal opinion.

Question
136

Variable
vig11

Example 1

Before the birth of their child, the mother earned more than the father.

Until now, the child was cared for primarily by the mother and quickly adapts to new environments and people.

The family has now been offered a place for their child in a reputable daycare facility. Income from only one full-time or two part-time jobs would not be sufficient to maintain the family's desired standard of living.

The mother has good career advancement opportunities at her job, but the father doesn't. The mother's employer supports absence periods or part-time work for parents, the father's employer does not.

INFOBOX

Starting with wave 10, the fertility module has been shortened for female respondents of the oldest birth cohort (cohort 3) who no longer expect to have (further) children. The auxiliary variable hfrtk3 has been generated to identify these respondents in the question filters.

This variable is defined as hfrtk3=1, if doby=1971,...,1973 & original_sex=2 & (frt26=7 | frt27=2).

As a first step, i.e. for respondents expecting a child, hfrtk3 is coded as 1, if doby=1971,...,1973 & original_sex=2 & (frt27=2).

Newborn module

INFOBOX

Question 228 (crn1kx) to Question 233 (crn6kx_) are posed as a block first for the first child born since the previous interview, and then for each additional newborn.

The "x" in these variables corresponds to the child identification number. If the respondent, for example, already had two older children, and another child has been born since the previous wave, these questions are not posed for the first two children with the child identification number one (x=1) and two (x=2); these variables are coded -3 "does not apply". The following questions are then posed only for the newborn child (x=3) and the variables have valid values only for this case.

INFOBOX

Question 234 (crn37kx) to Question 248 (crn45kx_) are posed for each (relevant) child in blocks, i.e. all questions are posed first for the first child and then, in subsequent iterations, for each additional child.

The "x" in the variables refers to the child identification number. If the respondent has, for example, an older child and a baby, the questions are not posed for the older child with the child identification number of 1 (x=1) and each of the variables are coded with the value of -3 "does not apply". The questions are then posed for the younger child and the variables are coded with valid values.

Definition of target children for the parenting survey

The selection of the children relevant for the parenting survey is defined as follows:

Child x is selected as a parenting survey child if one of the following conditions is met:

- Child x is a CAPI child
- Child x is a biological or adopted child, was born between 6 and 15 years before the start of fieldwork (and alive), lives exclusively outside the household, and is in contact with respondent
- Child x is 6-7 years old and lives with respondent in the same household

Formal condition: $\text{capikidkx}=1 \mid (\text{ehc9kx}=1,2 \ \& \ \text{ehc11kx}=0 \ \& \ \text{ojj-ehc8kxy} \geq 6 \ \& \ \text{ojj-ehc8kxy} \leq 15 \ \& \ \text{ehc10kx} > 8 \ \& \ \text{crn16kx}=1,\dots,6) \mid (\text{ag5kx}=1 \ \& \ \text{ehc11kx}=0 \ \& \ \text{ehc10kx}=1,\dots,8).$

If child x (with $\text{cid } x=1,\dots,15$) is selected as a parenting survey child, the variable pqkx is set to 1.

The assignment of a parenting survey instrument to the respective children is clearly indicated by the identification number $\text{cidx}=\text{id}+200+x$.

Consent to the Parenting Adolescents and Young Adults (PAYA) survey

INFOBOX
Definition of target children for the PAYA survey

The selection of the children relevant for the PAYA survey is defined as follows:
Child x is selected as a target child for the PAYA survey if one of the following conditions is met:

- Child x lives with the respondent in the same household, was born at least 16 years before fieldwork began, and was not older than 15 in wave 2.
- Child x lives exclusively in another household, is a biological, adopted, or partner's child, is in contact with the respondent, was born at least 16 years before the start of the panel (and is still living), and was not older than 15 in wave 2.

Formal condition: $(oij-ehc8kxy \geq 16 \ \& \ ehc8kxy \geq 1994 \ \& \ ehc11kx = 0 \ \& \ (ehc10kx = 1, \dots, 8 \mid (ehc10kx > 8 \ \& \ ehc9kx = 1, 2, 3 \ \& \ (crn16kx = 1, \dots, 6 \mid crn97kx = 1, \dots, 6))))$.

If child x (with child identification number $x = 1, \dots, 15$) is selected for the PAYA survey, the variable `youkx` is set to 1.

The assignment of a PAYA survey instrument to the respective children is clearly indicated by the identification number $cidx = id + 200 + x$.

Question 289

Variable `cys1`

As children become adults, many things begin to change in their lives, which has an effect on the relationship their parents have with them. We would like to focus more on these changes. To this end, we have prepared a short, additional questionnaire concerning the relationship you have with your adult child [name `youkid` (`ehc7kxn` with `youkx=1`)] [if more than one `youkid` (`youkx=1` for more than one $x = 1, \dots, 15$): your adult children [names of all `youkids`]].

I will leave this questionnaire [if more than one `youkid` (`youkx=1` for more than one $x = 1, \dots, 15$): these questionnaires] **here, so that you can fill it** [if more than one `youkid` (`youkx=1` for more than one $x = 1, \dots, 15$): them] **out at the end of this interview at your own pace.**

Is that okay for you?

Yes ☐ 1

No ☐ 2

Respondents with at least one child selected for the PAYA (at least one $x = 1, \dots, 15$ with `youkx=1`)

Question 290

Variable `cys2`

Identification number anchor (=Household number): [id]

Parenting survey number: [cidx]

First name youkid: [ehc7kxn mit youkx=1]

Respondents who consented to the PAYA survey for at least one child (cys1=1)

INFOBOX

The selection of children for the PAYA survey for partners is defined as follows:

Partners will be selected to answer the PAYA survey regarding child x if the following criteria are fulfilled:

- Child x lives with the respondent and his/her partner in the same household, was born at least 16 years before the start of the panel, and was not older than 15 in wave 2.
- Child x is the respondent's and his/her partner's biological child, lives exclusively in another household, is in contact with the respondent's partner, was born at least 16 years before the start of the panel (and is still living), and was not older than 15 in wave 2.

Formal condition: $(hpc=1 \ \& \ oij-ehc8kxy \geq 16 \ \& \ ehc8kxy \geq 1994 \ \& \ ehc11kx=0 \ \& \ (ehc10kx=1, \dots, 8 \mid (ehc2py=1 \ \& \ ehx12kx=y \ \& \ ehc9kx=1 \ \& \ ehc10kx > 8 \ \& \ crn17kx=1, \dots, 69)))$.

When a partner is selected to answer the PAYA survey regarding child x (with child number $x=1, \dots, 15$), the variable pyoukx is set to 1.

The assignment of a PAYA survey instrument to the respective children is clearly indicated by the identification number $cidx=id+200+x$
